| About the Organizer     | <p>Founded in 1964, Shandong Foreign Trade Vocational College is a full-time state-owned vocational college and it is one of the earliest schools in China specializing in international business education. Over the past 50 years, 50,000 graduates completed their education here and they have founded over 3,000 enterprises, contributing greatly to regional economic development. Currently, there are 9,100 student and 500 teachers, and 200 of them with high professional titles. There are 120 teachers engaged in foreign languages teaching, like English, Japanese, Korean, and reserved teachers for German, French, Russian and Spanish teaching. Eight teachers have been trained in European Union successively and got simultaneous interpreters qualification. The college has established close partnership with Ministry of Commerce, Department of Commerce, Bureau of Commerce, Foreign Trade Industrial Association and foreign trade enterprises etc. and it is deputy director's unit of National Steering Committee for Foreign Trade Education and Instruction and director's unit of Committee of Business English. The college, featuring foreign trade, foreign language, foreign trade transport and outsourcing, has established over 24 majors such as international trade practice, accounting, software technology, business English, custom clearance and international freight, logistics management, civil aviation commerce, air service etc. The college possesses Taian Training Base with 60,000 m<sup>2</sup> construction area, Shandong Cross-border E-commerce Training Base with 16,000 m<sup>2</sup> construction area, 5 research centers including international logistic research center and over 200 training bases established, by cooperation with Xinhua Jin Group, Haifeng International Holdings Company, Hisense Group and other well-known enterprises and alumni enterprises.</p> |                      |
| Training Course Content | <p>This training course is designed for officials of agriculture management and high-level management staff and technical experts in developing countries. It is mainly about practical techniques about fruits and vegetables processing, including Introduction to fruits and vegetables processing, quality control and test of juice processing, techniques and procedures of preserved fruits processing, dried fruit and fruit powder processing, different fruits processing procedures for different fruits, fruit wine processing(grape wine, apple wine), fruit powder production in ultralow temperature, canned fruits processing techniques and dry vegetables producing techniques etc.</p> <p>This course will take teaching approaches of discussion, cases and interaction, and will attach much importance on the combination of teaching and practice. During the training, the participants will be arranged to visit major light industrial enterprises and go to Yantai, Pingyi, Jinan, Zhangqiu, Qingdao and Beijing to take field lessons. In this way, the participants can learn more about the advanced experience, technology level and practical techniques of fruits and vegetables processing application and can have more comprehensive and thorough knowledge of the developmental level of China's fruits and vegetables processing techniques, and thus get a better understanding of what they have learned at classes.</p> <p>Through the training course, we believe that the participants would broaden their horizons and explore new ideas within limited time and it also provides a good platform for the participants to communicate experience as well as improve capabilities.</p>   |                      |
