Sponsored by the

SINGAPORE COOPERATION PROGRAMME

under the

**SINGAPORE COOPERATION PROGRAMME TRAINING AWARD/
SMALL ISLAND DEVELOPING STATES TECHNICAL COOPERATION
PROGRAMME**

to be conducted by the

NATIONAL PARKS BOARD

Singapore Cooperation Programme

Singapore has provided technical assistance to other developing countries since the 1960s. As a country whose only resource is its people, Singapore believes that human resource development is vital for economic and social progress. Singapore itself has benefited from training provided by other countries and international organisations.

In 1992, the Singapore Cooperation Programme (SCP) was established to bring together under one framework the various technical assistance programmes offered by Singapore. Through the SCP, the range and number of training programmes were increased to share Singapore's development experience with other developing countries.

To date, Singapore has sponsored training courses and study visits for over 110,000 officials from more than 170 countries. The SCP is managed by the Technical Cooperation Directorate of the Singapore Ministry of Foreign Affairs.

National Parks Board

The National Parks Board (NParks) is responsible for providing and enhancing the greenery of Singapore which the government calls a "City in a Garden". NParks also engages the community in enhancing the quality of their living environment. It manages over 300 parks and 4 nature reserves including the Sungei Buloh Wetland Reserve, recognised as a Flyway Site of international importance for migratory shorebirds since 2002.

As the lead agency in nature conservation, NParks has developed an urban biodiversity conservation model, which aims to conserve representative eco-systems in land-scarce Singapore. NParks also monitors and coordinates measures to enhance the presence of biodiversity in Singapore's urban landscape.

Course Objectives

This course will provide participants with a basic understanding of coastal wetland ecosystems, migratory bird flyways focusing on the East Asian-Australasian Flyway (EAAF), shorebird conservation, community engagement and public awareness programming concepts.

It will also give participants an overview of wetland ecology and enable participants to understand effective management and sustainable utilisation of wetland resources.
