Ⅰ. PROGRAM OVERVIEW

◼ **Program Title**

   Master's Degree Program in Techno-Entrepreneurship Competency Based on EE & ICT Convergence

◼ **Period**
   - Stay period: August 6, 2018 - January 5, 2020 (17 months of study in Korea including 2 weeks of pre-course)
   <u>During the 17 months in HGU, students are strongly recommended to complete their thesis.</u>

   - Academic period: August 6, 2018-March 5, 2020 (19 months)
   <u>In accordance to the university regulations, the diploma will be issued in February 2020.</u>

◼ **Degree**

   Master of Science in ICT convergence

◼ **Program Background**

  - The economic development model based on cheap labor has been failed to lift up developing countries from poverty or to build their capacities in this digital information era. If the status quo were to prevail, the gap between developed countries and developing countries will only widen.
  - EE (Electrical Engineering) and ICT convergence, which formed the basis for the fourth industrial revolution, provide opportunities for a quantum leap of the developing countries based on entrepreneurship and innovation.
  - The need, which creates more jobs and opportunities for the growth of the developing countries through education and practical training in EE and ICT convergence field, is growing.

◼ **Objectives**

  - Training government and NGO officials in the EE and ICT convergence field of the developing countries to foster greater entrepreneurship and capacity building
  - Training domestic leaders in the EE and ICT convergence field in a systematic and practical manner to create policies and attract capital investments for their countries
  - Training government officials' problem-solving skills through a real world problem analysis and solving in the EE and ICT convergence field
  - Sharing Korea's experiences in the EE and ICT convergence field as well as raising mutual understanding among Korea and developing countries

▣ Goals

- Nurturing experts in the EE and ICT convergence field of the developing countries so that they can lead economic development in their countries through the understanding of Korea's EE and ICT convergence developing stories and models in addition to mutual benefits between both counties

- Building up networks among industry experts and investors in Korea and developing countries' government and NGO officials so that they can form an effective partnership and support technological and economic growth between both countries

▣ Training institute

Graduate School of Global Development & Entrepreneurship,
Handong Global University (hereinafter referred to as HGU)

▣ Number of participants: 15 government officials

▣ Language: English fluency that requires no translation

International students regularly organize a culture night event to share their cultures with Korean students (cultural performances, global food fair and more).

Ⅲ. TRAINING INSTITUTE

1. GENERAL INFORMATION

1) Introduction of Handong Global University and Graduate School of Global Development & Entrepreneurship

Handong Global University (HGU) was founded in 1995 and it is located in the rolling hills of the eastern coast of Pohang, Korea. Perched atop a hill, covering over 200 acres, the campus looks out over both the East Sea, and the western Pacific Ocean with a small lake bordering the east side of the campus.

Since its foundation, HGU has been promoting the globalization of education and its campus under the slogan "Why not change the world?". Our vision is to show love towards our neighbors and to change the world by maximizing both students' and professors' talents. HGU has uniquely contributed to the advancement of undergraduate education by creatively using global human resources for a holistic education that develops both character and knowledge. In addition, HGU has been drawing attention with its innovative educational curriculum that advances the 21st century's requirement of learning and problem - solving in a globalized era.

Competency is strengthened not with knowledge-delivery education styles or teaching by rote memorization but with practical education that guides students in solving problems. HGU helps students build their competencies through project-based courses and nurtures well-balanced talents that play an important role in the world.
