

MALAYSIAN TECHNICAL COOPERATION PROGRAM (MTCP) 2019

DEVELOPMENT OF PHYSICAL INFRASTRUCTURE IN MALAYSIA

01st – 10th JULY 2019
KUALA LUMPUR, MALAYSIA

THE MALAYSIAN TECHNICAL COOPERATION PROGRAM (MTCP) was first initiated at the First Commonwealth Heads of Government Regional Meeting (CHOGRM) for Asia Pacific Region in Sydney in February 1978. It was officially launched on 7 September 1980 at the 2nd CHOGRM in New Delhi, India, to signify Malaysia's commitment to South-South Cooperation, in particular Technical Cooperation among Developing Countries (TCDC).

In line with the spirit of South-South Cooperation, Malaysia through the MTCP shares its development experiences and expertise with other developing countries. The MTCP was first formulated based on the belief that the development of a country depends on the quality of its human resources. The programme forms part of the commitment of the Malaysian Government towards the promotion of technical cooperation among developing countries, strengthening of regional and sub-regional cooperation, as well as nurturing collective self-reliance among developing countries.

The MTCP emphasizes the development of human resources through the provision of training in various areas which are essential for a country's development such as public administration, good governance, health services, education, sustainable development, agriculture, poverty alleviation, investment promotion, ICT and banking. Since its inception in 1980, more than 33,000 participants from 144 recipient countries have benefited from the various programmes offered under the MTCP. More information at MTCP website: www.mtcp.kln.gov.my

The Objectives of MTCP are:

- To share Malaysia's development experience with other developing countries;
- To strengthen bilateral ties with developing countries;
- To encourage and promote South-South Cooperation; and
- To encourage and promote technical cooperation within developing countries

ABOUT CIDB HOLDINGS SDN BHD

CIDB HOLDINGS (CIDBH) corporate standing as a fully owned subsidiary of the Construction Industry Development Board Malaysia (CIDB Malaysia) represents one of the strategic platforms for CIDB Malaysia to fulfill its role as a regulatory body, and custodian of the Malaysian Construction Industry. Since its inception on 1997, CIDBH has effectively orchestrated the emerging forms of its corporate functional roles in the following areas:

- Helping to raise the levels of quality output and productivity in the Malaysian Construction Industry via undertaking of construction workforce training, skills assessment and evaluation programs;
- Fulfilling its role as a program enabler to spearhead various CIDB-led "Going Global" initiatives.

COURSE OVERVIEW

Malaysia has reasonably well-developed set of infrastructure facilities. The Government had built on national infrastructure framework to promote economy development and to cater needs of the people. All categories of infrastructure have since expanded manifold and facilities have also been modernized. The development of infrastructure has required very large investments. The infrastructure sector has received the largest share of public sector development expenditure in every one of the Malaysia Plans. Private sectors are now actively involved in infrastructure development where the Government had line-out many incentives and programs that could facilitate this activity.

This course will provide platform for Malaysia professionals and contractors to share experience and to promote our capability in developing infrastructure projects. Some samples of infrastructure projects are highways, bridges, airports, mass transit and urban transportation system, rail projects, water supply and water resources; wastewater management; solid-waste treatment and disposal; electric power generation and transmission and telecommunications. Malaysia has several infrastructure mega projects that could be promoted such as Tun Razak Exchange, Pan Borneo Highway, Light Rail Transit Line 3 (LRT3), Kuala Lumpur International Airport (KLIA 2) and etc.

COURSE OBJECTIVES

- To share and train senior officials and professionals from relevant foreign ministries / government departments / agencies in the development of physical structure in Malaysia
