

ABOUT MALAYSIAN TECHNICAL COOPERATION PROGRAMME (MTCP)

The Malaysian Technical Cooperation Programme (MTCP) was first initiated at the First Commonwealth Heads of Government Regional Meeting (CHOGRM) for Asia Pacific Region in Sydney in February 1978. It was officially launched on 7 September 1980 at the 2nd CHOGRM in New Delhi, India, to signify Malaysia's commitment to South-South Cooperation, in particular Technical Cooperation among Developing Countries (TCDC).

In line with the spirit of South-South Cooperation, Malaysia through the MTCP shares its development experiences and expertise with other developing countries.

Since its inception in 1980, more than 33,000 participants from 144 recipient countries have benefited from the various programmes offered under the MTCP. More information at MTCP website : www.mtcp.kln.gov.my

MTCP OBJECTIVES

1. To share development Malaysia's experience with other countries
2. To strengthen bilateral relations between Malaysia and other developing countries;
3. To promote South-South Cooperation (SSC) (SSC);
4. To promote technical cooperation amongst developing countries (TCDC)

ABOUT INSTITUTE FOR HEALTH MANAGEMENT (IHM)

Institute for Health Management (IHM) is one of the 6 institutes under the umbrella of National Institute for Health (NIH), Ministry of Health Malaysia. Our core business is research, training and consultancy related to health management. Moving forward as a premier learning organization, IHM has conducted local and international training for various healthcare service providers' professional development.

As a research and training institute for Ministry of Health Malaysia, IHM plays a prominent role in the enhancement of healthcare services and optimizing resources through research, training and consultancy into areas pertaining to patient satisfaction, human resource management, efficiency and quality service performance. Our targeted participants are professionals, mid-level managers and supervisors from the Ministry of Health.

TARGET PARTICIPANTS

Professionals working in:

- public health organizations,
- disease control agencies,
- field environment

who seek to acquire knowledge on how to gather epidemiological intelligence in field and to manage them effectively.
