

ABOUT MALAYSIAN TECHNICAL COOPERATION PROGRAMME (MTCP)

The Malaysian Technical Cooperation Programme (MTCP) initiated at the first Commonwealth Heads of Government Regional Meeting (CHOGRM) for Asia Pacific Region in Sydney in February 1978. It was officially launched on 7 September 1980 at the 2nd CHOGRM in the New Delhi to signify Malaysia's commitment to South-South Cooperation, in particular Technical Cooperation among Developing Countries (TCDC). In line with the spirit of South-South Cooperation, Malaysia through the MTCP shares its development experiences and expertise with other developing countries. The MTCP was first formulated based on the quality of its human resources.

Annually, MTCP collaborates with its leading Training Institutions to conduct more than 50 capacity building programmes in various key areas of development. Since its inception in 1980, more than 33,000 participants from 144 countries have benefited from the various programmes offered under MTCP. More information is available at MTCP website: www.mtcp.kln.gov.my

OBJECTIVES OF MTCP

- To share development experience with other countries;
- To strengthen bilateral relations between Malaysia and other developing countries;
- To promote South-South Cooperation (SSC); and
- To promote technical cooperation among developing countries (TCDC).

TYPE OF ASSISTANCE

- Short-term specialised courses.
- Long-term courses (Scholarships).
- Technical Assistance.
- Dispatch of experts.

ABOUT MULTIMEDIA UNIVERSITY

In 1996, the Government of Malaysia was looking for methods to liberalise higher education in the nation, and to involve the private education sector in the development of this critical sector of human capital building. In October 1996, the then Telekom Malaysia was given the distinction by the Ministry of Education to set up the first private University in Malaysia. TM accepted the invitation and Universiti Telekom was established in Melaka. A year later, with the planning of the MSC underway, the government was once again looking for a suitable candidate to construct a university in the heart of the MSC. In March 1997, TM was again honoured when it was given the task to set up this university, to be known as Multimedia University. Considering that the telecommunications industry was becoming closely linked with developments in ICT, expansion into an education field directly related to ICT is a natural strategic decision. Then, on 25th January 2016, MMU launched its third campus in Educity, Iskandar Puteri, Johor which exclusively delivers MMU Cinematic Arts Programme. MMU aspires to become a top 100 University in Asia with Global Recognition through Quality Student and Staff Engaged in Innovative Academic Programmes and Research driven by Academic and Commercial Revenue streams.

ABOUT FACULTY OF APPLIED COMMUNICATION (FAC)

The acronym of "FAC" uniquely represents the strength of communication being a salient academic attraction, aptly translated into a faculty for applied communication, a discipline that finds its most advantageous position in a media-driven world where social networking, media creation, computer-mediated communication and digital economy rise to prominence. FAC extends the learning opportunities on campus by incorporating professional internship and practical exposure to give student transformational experiences and confidence to join the workplace. Our programme is unique as multimedia related subjects and an array of electives, including foreign languages are integrated into one programme. Our graduates will be multimedia savvy communication strategists who are proficient in a minimum of three languages. FAC student and staff are dedicated to build and change the communication landscape.

Lifelong Learning and Knowledge Model for Digital Cities Development and Sustainability (DCDS)

17th August – 2nd September 2019

MULTIMEDIA UNIVERSITY

ABOUT THE COURSE

Digital cities are a grand and complex topic. Recently, there are many forums related to digital and smart cities happening in Malaysia. Many city councils are actively participating in the discourse, planning and implementation of digital solutions to their cities. This course is offered to those who are concerned about the plan and development of digital and smart cities in their own localities or cities, and yet, would like to get experiences from some potential success stories (or case studies) in digital cities planning, implementation and development. This course aims to introduce different knowledge models of digital cities planning, development, measurement and sustainability for the needs of city folks of various age levels or group of users reside in the cities. The course will specifically emphasise on the lifelong learning and knowledge model for social and people centric cities development and sustainability, as well as introducing crucial technology methods and solutions for some cities services.

PROGRAMME OBJECTIVES

At the end of this course, the participants will be able to:-

- Explore the knowledge model for the development of digital cities, especially on the aspect of green and sustainability efforts, culture and heritage preservation, and creative co-creation processes for smart cities innovation.
- Gain lifelong learning model and social well-being aspect for the people in the cities aiming at community development, and also volunteerism model will be introduced for cities advancement.
- Acquire the knowledge on technology supported smart system for cities' services such as on waste management and IoT smart solutions.

COURSE CONTENT
