Brighter
Future !!

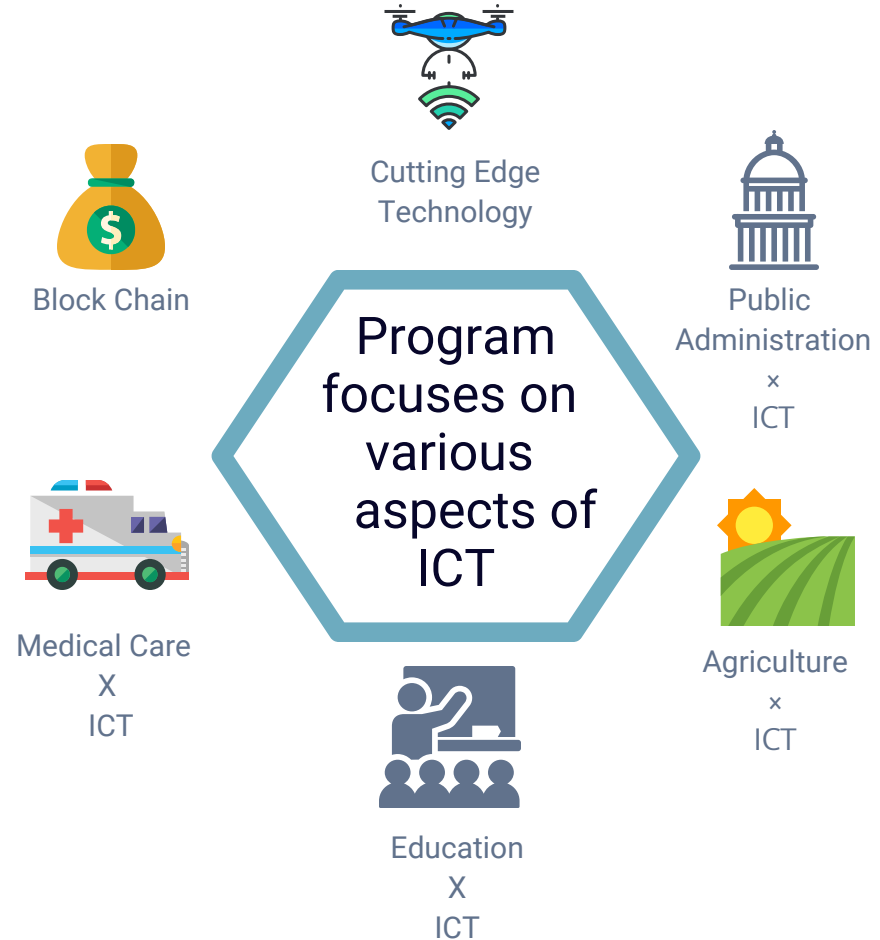

Japan International Cooperation Agency

Digital Transformation is a key for all to realize sustainable development.

Japanese Government is promoting a public policy called "**Society 5.0**" to achieve a human-centered society by using ICT.

This Program provides participants with knowledge on ICT development in Japan so that they can **acquire clues to promote digital transformation** in their respective countries.

The world is facing a great tide of change such as “technological change”, “economic and geo-political change” and “change in mindset”.

Every change brings opportunities as well.
Imagination is the key to shaping the future.
