## GENERAL INFORMATION ON

**Strategic Management and Marketing  
for Sustainable Local Industry Development (B)**

**課題別研修「戦略的マネジメント・マーケティング  
による持続的地場産業振興(B)」**

**JFY 2023**

**NO. 202210152J001**

**Course Period in Japan: From September 13 to October 11, 2023**

This information pertains to one of the JICA Knowledge Co-Creation Programs (Group & Region Focus) of the Japan International Cooperation Agency (JICA) implemented as a part of the Official Development Assistance of the Government of Japan based on bilateral agreement between both Governments.

### JICA Knowledge Co-Creation Program (KCCP)

The Japanese Cabinet released the Development Cooperation Charter in February 2015, which stated, *"In its development cooperation, Japan has maintained the spirit of jointly creating things that suit partner countries while respecting ownership, intentions and intrinsic characteristics of the country concerned based on a field-oriented approach through dialogue and collaboration. It has also maintained the approach of building reciprocal relationships with developing countries in which both sides learn from each other and grow and develop together."* JICA believes that this 'Knowledge Co-Creation Program' will serve as a foundation of mutual learning process.

# ***I. Concept***

## **Background**

The number of disasters such as massive floods, wildfires, and draughts is dramatically increasing. Due to anthropogenic climate change, agriculture and the local economy are negatively affected ever before. All member states of the United Nations adopted the sustainable development goals (SDGs) in 2015. However, we have not taken effective countermeasures yet. To achieve SDGs, it is indispensable to accelerate the transformation from "business as usual" to the sustainable business models, obtaining economic profits while solving social and environmental problems.

This program is designed and developed in Hokkaido Prefecture, Japan, one of the most advanced agricultural region in Japan, and implementing the strategy for sustainable food systems.

## **For what?**

This program aims to equip the participants with strategic management and marketing skills that could support them in designing sustainable and innovative policies and business models for local industry development.

## **For whom?**

This program is offered to the person concerned with central and local government, non-governmental organizations (NGOs), chambers of commerce, and agricultural cooperatives who are pertaining to rural development and promotion of small-scale industries and managers of agriculture or food-related companies.

## **How?**

The participants shall have opportunities to learn how to design sustainable development of organizations, the region, and the nation through lectures, discussions, and workshops. Participants will formulate an action plan describing what they will do in their country, putting the knowledge and ideas acquired and discussed into their ongoing activities.

In the middle of the course, there is an opportunity to exchange the best practices of all participants countries.

“Best Practice” means the best policy or program to develop sustainable industries and regions by your organization.

This is one of the highlights of this course.

Every time, we have around 20 participants all over the world (Africa, Middle East, Eastern Europe, Asia and South America.). We have realized that almost all countries have similar problems however they have different approaches and different solutions, therefore, exchanging the effective policies and program is a beneficial activity for all participants.

To implement your presentation smoothly, please bring information about the best policy or program. The information should include statistical data, result and pictures or photographs.

## ***(Interim Report) Action Plan***

At the end of the program, you will make your action plan utilizing your experience and knowledge of the course. Also, you should make a presentation about your action plan.

**The purpose of the action plan:** Through this program, you will obtain various information, knowledge, and experiences. Utilizing all of them, you should demonstrate your understanding and formulate a project to improve your regional industries. This action plan should be an effective and feasible project to improve the situation of SMEs and farmers in your responsible region. To make your action plan, you should bring all related information about the situation of SMEs and farmers and policies of your country, your region, and your organization.

To make good reports and presentations, we recommend you to use statistical data related reports, photographs, and other related materials.

## **For Your Reference**

### **JICA and Capacity Development**

Technical cooperation is people-to-people cooperation that supports partner countries in enhancing their comprehensive capacities to address development challenges by their own efforts. Instead of applying Japanese technology per se to partner countries, JICA's technical cooperation provides solutions that best fit their needs by working with people living there. In the process, consideration is given to factors such as their regional characteristics, historical background, and languages. JICA does not limit its technical cooperation to human resources development; it offers multi-tiered assistance that also involves organizational strengthening, policy formulation, and institution building.

Implementation methods of JICA's technical cooperation can be divided into two approaches. One is overseas cooperation by dispatching experts and volunteers in various development sectors to partner countries; the other is domestic cooperation by inviting participants from developing countries to Japan. The latter method is the Knowledge Co-Creation Program, formerly called Training Program, and it is one of the core programs carried out in Japan. By inviting officials from partner countries and with cooperation from domestic partners, the Knowledge Co-Creation Program provides technical knowledge and practical solutions for development issues in participating countries.

The Knowledge Co-Creation Program (Group & Region Focus) has long occupied an important place in JICA operations. About 400 pre-organized courses cover a wide range of professional fields, ranging from education, health, infrastructure, energy, trade and finance, to agriculture, rural development, gender mainstreaming, and environmental protection. A variety of programs is being customized by the different target organizations to address the specific needs, such as policy-making organizations, service provision organizations, as well as research and academic institutions. Some programs are organized to target a certain group of countries with similar developmental challenges.

### **Japanese Development Experience**

Japan, as the first non-Western nation to become a developed country, built itself into a country that is free, peaceful, prosperous and democratic while preserving its tradition. Japan will serve as one of the best examples for our partner countries to follow in their own development.

From engineering technology to production management methods, most of the know-how that has enabled Japan to become what it is today has emanated from a process of adoption and adaptation, of course, has been accompanied by countless failures and errors behind the success stories.

Through Japan's progressive adaptation and application of systems, methods and

technologies from the West in a way that is suited to its own circumstances, Japan has developed a storehouse of knowledge not found elsewhere from unique systems of organization, administration and personnel management to such social systems as the livelihood improvement approach and governmental organization. It is not easy to apply such experiences to other countries where the circumstances differ, but the experiences can provide ideas and clues useful when devising measures to solve problems.

JICA, therefore, would like to invite as many leaders of partner countries as possible to come and visit us, to mingle with the Japanese people, and witness the advantages as well as the disadvantages of Japanese systems, so that integration of their findings might help them reach their developmental objectives.
