CLIMATE CHANGE, FORESTS AND BIODIVERSITY

| | | | | |
|-------------------------|---|--|-------------------------------------|---|
| OFFERING ENTITY: | The National Forest and Wild life Service - SERFOR | | SDG: |   |
| ADDRESS: | Avenida Javier Prado Oeste N° 244, Magdalena del Mar, Lima | | PHONE | (51-1) 225 9005 |
| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: National Forest Inventories | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | Carry out capacity building for planning, field execution, quality control, data processing and analysis of results of national forest inventories. Since 2013, SERFOR's Inventory and Valuation Department has been executing the National Forest and Wildlife Inventory of Peru, which has become a state-of-the-art tool for forest management, providing updated and reliable information on status and diversity of wild flora and fauna, biomass and carbon, and forest socioeconomic information. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts. | | <input checked="" type="checkbox"/> | |
| 3.2. | Exchange of experiences | | <input checked="" type="checkbox"/> | |
| 3.3. | Internships | | <input checked="" type="checkbox"/> | |
| 3.4. | Short term training courses and seminars | | <input checked="" type="checkbox"/> | |
| 3.5. | Studies and Joint Researches | | <input checked="" type="checkbox"/> | |
| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | |
| | | | | |
| V. | TRAINING OFFER | | | |
| 5.1. | Name: National forest inventory management | | | |
| 5.2. | Duration: 7 days | | | |
| VI. | LANGUAGES IN WHICH TRAINING OFFER CAN BE DELIVERED | | | |
| | English and Spanish | | | |

| | | | | |

| OFFERING ENTITY: | The National Forest and Wildlife Service - SERFOR | | SDG: |   |
| ADDRESS: | Avenida Javier Prado Oeste N° 244, Magdalena del Mar, Lima | | PHONE: | (51-1) 225 9005 |
| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Production and promotion of forest and wildlife investment | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | Carry out knowledge transfers in model for access to timber and non-timber forest resource harvesting in Peru (timber and non-timber forest concessions). Also, transfer of knowledge from actions to promote wood and non-wood forest products and wildlife. Promoting public and private investment in forestry sector, and closing infrastructure and service gaps The aim is to generate information to encourage private investment in timber and wildlife production chains. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts | | | <input type="checkbox"/> |
| 3.2. | Exchange of experiences | | | <input checked="" type="checkbox"/> |
| 3.3. | Internships | | | <input checked="" type="checkbox"/> |

|--|---|--|---------------|---|
| OFFERING ENTITY: | | The Ministry of the Environment - MINAM | SDG: |  |
| ADDRESS: | | Av. Antonio Miroquesada N° 425 4° piso, Urb. San Felipe, Magdalena del Mar - Lima | PHONE: | (51-1) 611 6000 |
| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Environment TOPIC: Dissemination of scientific research | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| The Experience Exchange Workshop on environmental research repositories will allow sharing of experiences, technologies, methodologies, knowledge (<i>Know-how</i>) and lessons learned that can be replicated or adapted in different contexts, with the aim of improving and strengthening the management of repositories for promotion and dissemination of environmental research. | | | | |
| III. KIND OF COOPERATION OFFERED | | | | |
| 3.1. | Short-term experts | <input type="checkbox"/> | | |
| 3.2. | Exchange of experiences | <input checked="" type="checkbox"/> | | |
| 3.3. | Internships | <input type="checkbox"/> | | |
| 3.4. | Short term training courses and seminars | <input type="checkbox"/> | | |
| 3.5. | Studies and Joint Researches | <input type="checkbox"/> | | |
| IV. PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | | |
| | | | | |
| V. TRAINING OFFER | | | | |
| 5.1. | Name: Experience Sharing Workshop on Environmental Research Repositories | | | |
| 5.2. | Duration: To be determined with the institution concerned | | | |
| VI. LANGUAGES IN WHICH TRAINING OFFER CAN BE DELIVERED | | | | |

| OFFERING ENTITY: | The Ministry of the Environment - MINAM | | SDG: |   |
| ADDRESS: | Av. Antonio Miroquesada N° 425 4° piso, Urb. San Felipe, Magdalena del Mar - Lima | | PHONE: | (51-1) 611 6000 |
| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Environmental Land Management | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The Ecological and Economic Zoning is an instrument that allows the identification of the potentialities and limitations of territory from the evaluation of the physical, biological and socioeconomic components of territory. The use of this instrument guides adequate occupation of territory and use of natural resources. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts | | <input type="checkbox"/> | |
| 3.2. | Exchange of experiences | | <input checked="" type="checkbox"/> | |
| 3.3. | Internships | | <input type="checkbox"/> | |
| 3.4. | Short term training courses and seminars | | <input type="checkbox"/> | |
| 3.5. | Studies and Joint Researches | | <input type="checkbox"/> | |
| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | |
| | <i>El Salvador:</i> Exchange of experiences in formulation and implementation of ecological and economic zoning. Internships in formulation and application of ecological and economic zoning. Directors and Technicians of the Ministry of Environment and Natural Resources of El Salvador know technical procedure for the formulation of the EEZ and its application in management of the territory. The Ministry of Environment and Natural Resources of El Salvador, through the Management of Territorial Ordering, formulated its instrument of territorial diagnosis, considering the technical criteria given in Internships. | | | |
| | <i>Colombia:</i> Exchange of experiences in the process of Environmental Land Management. Specialists from the Ministry of Environment and Sustainable Development of Colombia know the technical procedure for the formulation of the EEZ, Integrated Coastal Marine Management and instruments for Disaster Risk Management with an environmental approach. | | | |
| V. | TRAINING OFFER | | | |
| 5.1. | Name: Strengthening Land Management through implementation of Ecological and Economic Zoning | | | |
| 5.2. | Duration: 5 days | | | |
| VI. | LANGUAGES IN WHICH TRAINING OFFER CAN BE DELIVERED | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Implementation of Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | MINAM has the role of Scientific Authority of CITES - Peru and coordinates the implementation of Convention in the country with the CITES - Peru Management Authorities. To this end, it successfully develops several initiatives, projects and instruments aimed at promoting sustainable use of wild species under pressure from international trade. Among the main axes promoted for these objectives are: i) generation of information for decision-making, ii) development of advisory mechanisms in taxa included in Appendices (terrestrial, continental and marine) and iii) development of instruments (e.g. Non-Detriment Findings, advice on conservation plans, recovery projects, among others). | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts | | <input type="checkbox"/> | |
| 3.2. | Exchange of experiences | | <input checked="" type="checkbox"/> | |
| 3.3. | Internships | | <input type="checkbox"/> | |
| 3.4. | Short term training courses and seminars | | <input checked="" type="checkbox"/> | |
| 3.5. | Studies and Joint Researches | | <input type="checkbox"/> | |
| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | |
| | | | | |
| V. | TRAINING OFFER | | | |
| 5.1. | Course: Implementation of CITES Convention on the Conservation of Species of Wild Fauna and Flora in International Trade Seminars/workshops: Studies and tools to promote sustainable use and recovery of wildlife species under pressure from international trade | | | |
| 5.2. | Duration: 7 days | | | |
| VI. | LANGUAGES IN WHICH TRAINING OFFER CAN BE DELIVERED | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Compensation Mechanisms for Ecosystem Services. | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>On June 29, 2014 and July 21, 2016, Law on Compensation Mechanisms for Ecosystem Services approved by Law No. 30215 and Regulations to the Law on Compensation Mechanisms for Ecosystem Services approved by Supreme Decree No. 009-2016-MINAM were published in Official Gazette El Peruano, respectively, whose purpose is to promote, regulate and supervise the design and implementation of Mechanisms of Retribution for Ecosystem Services (MRSE), derived from voluntary agreements that establish actions of conservation, recovery and sustainable use, in order to ensure the permanence of ecosystems. It is important to mention that MRSE constitute schemes, tools, instruments and incentives to generate, channel, transfer and invest economic, financial and non-financial resources, where an agreement between contributor(s) and payer(s) to ecosystem service is established, aimed at the conservation, recovery and sustainable use of the sources of ecosystem services.</p> | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts | | <input type="checkbox"/> | |
| 3.2. | Exchange of experiences | | <input checked="" type="checkbox"/> | |
| 3.3. | Internships | | <input type="checkbox"/> | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Environmental Economics | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>Economic valuation is a tool for estimating value of ecosystem goods and services in monetary terms, regardless of whether or not they have a market price, for which there is no reference exchange value.</p> <p>In this regard, many of the ecosystem services can be valued through application of economic valuation methods, with the objective of determining the benefits or costs associated with changes in ecosystems, as well as the source of the ecosystem services that affect people's well-being. Therefore, the application of economic valuation allows the incorporation of additional technical criteria to support decision-making in environmental management.</p> | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts | | | <input type="checkbox"/> |
| 3.2. | Exchange of experiences | | | <input checked="" type="checkbox"/> |
| 3.3. | Internships | | | <input type="checkbox"/> |

|-------------------------|--|--|---------------|---|
| OFFERING ENTITY: | The Geophysical Institute of Peru - IGP | | SDG: |  |
| ADDRESS: | Calle Badajoz Urb. 169 Urb. Mayorazgo IV Etapa, Ate - Lima | | PHONE: | (51-1) 317 2300 |
| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Geochemical / Isotopic tracers for environmental studies | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | Geochemical/isotopic tracers are complementary tools for monitoring and study of environmental systems (Ecosystems). In this sense, the geophysical Institute of Perú - IGP has specialists in the application of these methods in order to improve the understanding of natural systems and establish indicators that allow the understanding of processes and their alteration in face of any change in border conditions. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts. | | | <input type="checkbox"/> |
| 3.2. | Experience Exchange | | | <input type="checkbox"/> |

| OFFERING ENTITY: | The Geophysical Institute of Peru - IGP | | SDG: |  |
| ADDRESS: | Calle Badajoz Urb. 169 Urb. Mayorazgo IV Etapa, Ate - Lima | | PHONE: | (51-1) 317 2300 |
| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Paleoenvironmental / Paleoclimatic Reconstructions | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | Paleoclimate reconstructions are important inputs to evidence past extreme events of greater magnitude than those recorded during instrumental monitoring. In same way, extending the records of climate allows evidence of cyclicity in events on decadal or other scales, which are input for long-term planning. Through isotope analysis and diverse data in Speleothems (cave stalagmites), tree rings and sediments, it is possible to obtain time series of variables such as rainfall, temperature, among others that allow us to understand changes in climate. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Climate variability, extreme events and climate change | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The variability of the climate affects the different socioeconomic activities and very life of the population, extreme climatic events can develop, such as droughts or very intense rains, as well as extreme meteorological events that affect the development of a population. The Instituto Geofísico del Perú - IGP has researchers who have developed tools, using atmospheric models, satellite data and in situ data, to study climate and the different scales of its variability, ranging from day cycle to centuries. Knowledge of the physical processes that influence climate variability at the local scale is fundamental to understanding the outcomes of future climate scenarios and taking action to adapt to climate change. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts. | | <input type="checkbox"/> | |

| ADDRESS: | Calle Badajoz Urb. 169 Urb. Mayorazgo IV Etapa, Ate - Lima | | PHONE: | (51-1) 317 2300 |
| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Rainfall estimation and modeling | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | Precipitation is one of the most important environmental parameters in water management; however, its spatial quantification is complex due to its high spatial and temporal variability. Therefore, satellite data are used to estimate surface rainfall, using both passive and active sensors (radars); therefore, it is essential to evaluate the rainfall estimation algorithms of both ground-based radars and satellite-based radars (GPM), in order to have almost real time rainfall information, which can be used in flood warning models. The Geophysical Institute of Peru - IGP has experience in radar development, as well as evaluation of rainfall estimation algorithms, which is complemented by atmospheric models for rainfall prediction. Atmospheric models must also go through an evaluation process for the area where they are applied. Due to the complex topography in mountain areas, the models tend not to adequately represent the variability of rainfall, just as the satellite tends to underestimate the amount of precipitation. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |

| | | | | |
|---|---|--|---------------|---|
| OFFERING ENTITY: | | The Peruvian Amazon Research Institute - IIAP | SDG: |   |
| ADDRESS: | | Av. Abelardo Quiñones Km 2.5, Iquitos - Loreto | PHONE: | (51-65) 265 515 |
| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Agriculture TOPIC: Domestication of Amazonian fruit trees | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| One of the priority issues at the IIAP concerns the genetic and agronomic improvement of Amazonian and forest fruit species. It responds to the recognition of an ancestral activity of social importance for the Amazonian population. The involvement of the IIAP in subject has been multidisciplinary, from ecological studies to those of added value. This activity has a validity of about 50 years, having achieved the adoption in traditional systems of innovative species of the sustainability of production systems. An example of this is camu-camu (<i>Myrciaria dubia</i>) on whose fruit tree there is a select genetic background available to the productive systems, as well as technologies for its sustainable use in flooded environments of retingas (varzea) in white water basins. | | | | |
| III. KIND OF COOPERATION OFFERED | | | | |
| 3.1. | Short-term experts. | | | <input type="checkbox"/> |
| 3.2. | Exchange of experiences | | | <input type="checkbox"/> |
| 3.3. | Internship Riparian production systems, sustainability and impact | | | <input checked="" type="checkbox"/> |
| 3.4. | Short term training courses and seminars | | | <input checked="" type="checkbox"/> |
| 3.5. | Studies and Joint Researches : Nutrition and organic fertilization | | | <input checked="" type="checkbox"/> |
| IV. PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | | |
| Brazil and Bolivia: Improvement of competitiveness of production chains of Amazonian fruit species. Strengthening production chain of priority fruit species. After 10 years, the knowledge and technologies for production of those species studied are still being applied, but in some cases the limiting factor is the de-linking of markets. | | | | |
| V. TRAINING OFFER | | | | |
| 5.1. | Name: Flood-prone agroforestry | | | |
| 5.2. | Duration: 3 days | | | |
| VI. LANGUAGES IN WHICH TRAINING OFFER CAN BE DELIVERED | | | | |
| English, Spanish and Portuguese | | | | |

| | | | | |
|-------------------------|--|--|-------------------------------------|---|
| OFFERING ENTITY: | The Peruvian Amazon Research Institute - IIAP | | SDG: |  |
| ADDRESS: | Av. Abelardo Quiñones Km 2.5, Iquitos - Loreto | | PHONE: | (51-65) 265 515 |
| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Carbon Stock Measurement | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The IIAP, together with other international institutions, has been working on quantifying and monitoring carbon stocks in the Amazon forests. In 2010, the IIAP together with University of Leeds and RAINFOR produced a Manual for Monitoring the Carbon Cycle in Amazon Forests (Honorio & Baker 2010). In 2014 a map of the distribution and amount of carbon in Pastaza-Marañón basin was published, this area represents the largest peatland complex in the Amazon (Draper et al. 2014). | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts. | | <input checked="" type="checkbox"/> | |
| 3.2. | Exchange of experiences | | <input checked="" type="checkbox"/> | |
| 3.3. | Internships | | <input checked="" type="checkbox"/> | |
| 3.4. | Short term training courses and seminars | | <input type="checkbox"/> | |
| 3.5. | Studies and Joint Researches | | <input checked="" type="checkbox"/> | |
| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | |
| | | | | |
| V. | TRAINING OFFER | | | |
| 5.1. | Name : Monitoring of natural protected areas in Peru to increase resilience of forests to climate change (2017) Botanical Workshop: "Solving botanical identification knot in permanent plots"(2019) | | | |
| 5.2. | Duration: 7 days | | | |
| VI. | LANGUAGES IN WHICH TRAINING OFFER CAN BE DELIVERED | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Recovery of degraded areas due to land use change | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | Identified and select potential sites for purpose of recovering degraded areas, implementing multifunctional agroforestry systems with different approaches according to their capacity for greater use and preliminary evaluation of measures to be implemented in agreement with the producers in San Martín region. The propagation of species according to their use within the systems to be implemented will be of vital importance to improve the productive systems and take advantage of multifunctional benefits that can be obtained by the association of the species, be it for shade, nutrients, pest control, recovery of degraded areas and improvement of food and economic income in the short, medium and long term for the farmers. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts. | | <input checked="" type="checkbox"/> | |
| 3.2. | Exchange of experiences | | <input checked="" type="checkbox"/> | |
| 3.3. | Internships | | <input checked="" type="checkbox"/> | |
| 3.4. | Short term training courses and seminars | | <input type="checkbox"/> | |
| 3.5. | Studies and Joint Researches | | <input checked="" type="checkbox"/> | |
| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | |
| | Colombia: "Sustainable development options and land-use based alternatives to: Enhance climate change mitigation and adaptation capacities in the Colombia and Peruvian Amazon, while enhancing ecosystem services and local livelihoods" Expert intervention, exchange of experiences, information, course, workshop, seminars benefiting 18 producers. The project established a socio-economic baseline for small farmers in Yurimaguas, sampled 40 plots in various land uses for carbon sequestration and biodiversity studies, studied the possible impact of climate change on the main Amazonian crops, and implemented 63.8 hectares with sustainable land uses: 12.8 ha of cocoa in agroforestry systems, 6.5 ha of forest enrichment in fallow land, 16.7 ha of reforestation, 5.9 of palm heart and 21.9 ha of silvopastoral systems. Finally, 63.8 hectares with sustainable land uses were implemented: 12.8 ha of cocoa in agroforestry systems, 6.5 hectares of fallow forest enrichment, 16.7 ha of reforestation, 5.9 of palm hearts and 21.9 ha of silvopastoral systems, on 18 hectares in small communities of Yurimaguas. | | | |
| V. | TRAINING OFFER | | | |
| 5.1. | Name: Recovery of degraded areas due to land use change | | | |
| 5.2. | Duration: 7 days | | | |
| VI. | LANGUAGES IN WHICH TRAINING OFFER CAN BE DELIVERED | | | |

| OFFERING ENTITY: | The Forest and Wildlife Resources Monitoring Agency - OSINFOR | | SDG: | |
| ADDRESS: | Av. Javier Prado Oeste N° 692, Magdalena del Mar - Lima | | PHONE: | (51-1) 615 7373 |
| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Forest Alerts | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The activation of forest alerts is a mechanism used by OSINFOR, which allows timely transmission of information to Specialized Environmental Prosecutor's Offices-FEMA and the Regional Forestry and Wildlife Authorities, as appropriate, when the risk or alleged commission of environmental criminal offences (deforestation, illegal logging, illegal trafficking of timber products, functional liability and false information) and/or the alleged commission of administrative infractions is detected. The purpose of activating forest alerts is for the Public Prosecutor's Office, Regional Authorities and OSINFOR to act immediately and in a coordinated manner, in order to help prevent irreparable damage to the Nation's forest heritage and effectively combat illegal logging that affects forests. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts. | | <input type="checkbox"/> | |
| 3.2. | Exchange of experiences | | <input checked="" type="checkbox"/> | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Innovation and Technology Transfer TOPIC: Geosupervisor | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>"GEOSUPERVISOR", is a forest data collection software used to optimize time and information security in forest monitoring. The main objective of the practice is to achieve more agile and reliable forest supervisions that contribute to the sustainable development of the forest sector.</p> <p>The agility and reliability of the supervision reports are important so that these reports arrive with greater opportunity and with minimum risk of errors to the Directorate of Forest and Wildlife Control of the entity, so that it can carry out the legal evaluation and determine if it merits the initiation of a sanctioning process and the respective communication to authorities such as the Prosecutor's Offices, thus contributing to the fight against illegal logging and trade in wood. Likewise, the agility and reliability of the information are relevant to provide the administered a copy of the results of the supervision, which is not alterable and provides guarantee and confidence on the data collected. In addition, the results of supervision are recorded in the SIGOSFC system through which the information is transparent to the general public.</p> | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts. | | <input type="checkbox"/> | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Capacity-building | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The Forestry Backpack is a tool that OSINFOR has implemented to train new professionals, as well as to provide dynamic and participatory training to indigenous communities, in order to promote sustainable forest management within the framework of the Forestry and Wildlife Law, and thus avoid incurring the causes of infractions or expiration contemplated in the aforementioned law. Through the Forestry Backpack, native communities learn about three topics in a simple, friendly and participatory way: Community Forest Management, Timber Cubing and OSINFOR's Single Administrative Procedure (PAU) | | | |
| III. | KIND OF COOPERATION OFFERED | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Information Technologies and Biodiversity | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The Geographic Information System of Forestry and Wildlife Supervision of OSINFOR - SISFOR, is a technological platform that manages georeferenced information of the supervised forest enabling titles, allowing to know its biodiverse potential, geographic location of the area and trees supervised by OSINFOR. SISFOR, besides being online and free, has as its main source the information collected from the forest by its foresters, as part of the tree by tree supervisions, which gives the due support and reliability to the data it shows. | | | |

| | | | | |
|-------------------------|---|--|-------------------------------------|---|
| OFFERING ENTITY: | The National Institute for Research on Glaciers and Mountain Ecosystems - INAIGEM | | SDG: |  |
| ADDRESS: | Jr. Juan Bautista Mejía N° 887, Huaraz - Ancash | | PHONE: | (51-43) 221 766 |
| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Comprehensive Vulnerability Analysis | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>INAIGEM is developing a methodological proposal that seeks to integrate ecological, hydrological and social characterization in the analysis of the vulnerability of rural communities in the Andean area, to different types of hazards/risks. The development of this proposal is being worked on specifically for the risk of a glacial flood (called GLOF), but we consider that it will be applicable to other types of natural disaster risks and/or associated with climate change.</p> <p>The importance of this approach is that it integrates the relevance of ecosystem services, including water as a central component, provided by mountain ecosystems to the livelihoods of rural populations, in addition to having a comprehensive view of the livelihoods of these people. The aim is for this analysis to include the natural and social system in the same vulnerability analysis.</p> | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts. | | <input type="checkbox"/> | |
| 3.2. | Exchange of experiences | | <input checked="" type="checkbox"/> | |
| 3.3. | Internships (In-Service Training) | | <input type="checkbox"/> | |
| 3.4. | Short term training courses and seminars up to 20 people, two or three days, in Spanish. | | <input type="checkbox"/> | |
| 3.5. | Studies and Joint Researches - make comparative studies applying our proposal in similar ecosystems in Ecuador and/or Bolivia | | <input type="checkbox"/> | |
| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Ecological Condition in Mountain Ecosystems | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>INAIGEM is developing methodological proposals on how to assess the ecological condition of various mountain ecosystems. The process for identifying key indicators is based on a literature review of known ecological processes in ecosystems and their relationship to the maintenance of ecosystem service provision. We are also looking for indicators that are easy to measure and that can be sensitive to changes in the ecosystem.</p> <p>INAIGEM currently has personnel with experience in the development of a guide on bofedales (high Andean wetlands), as well as in working with the guide on grasslands, and in the process of developing a proposal on high Andean forests dominated by the genus Polylepis (queñuales).</p> | | | |
| III. | KIND OF COOPERATION OFFERED | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: National Inventory of Glaciers and Lagoons of Glacial Origin | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | INAIGEM will explain the procedures for carrying out the Inventory, which is developed on the basis of international standards (such as GLIMS, WGMS). Details will be provided on the type of information included (volume, dimensions, types, classification, altitudes, physical aspects, etc.) | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts. | | <input checked="" type="checkbox"/> | |
| 3.2. | Exchange of experiences | | <input checked="" type="checkbox"/> | |
| 3.3. | Internships | | <input checked="" type="checkbox"/> | |
| 3.4. | Short-term training courses and seminars to be determined with the interested institution, 15 persons, Spanish. | | <input checked="" type="checkbox"/> | |
| 3.5. | Studies and Joint Researches (remote sensing, geomatics, water resources, modelling) | | <input checked="" type="checkbox"/> | |
| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | |
| | | | | |
| V. | TRAINING OFFER | | | |
| 5.1. | Name: Training in methodology for the elaboration of an Inventory of Glaciers and Lagoons of Glacier Origin adapted to the Peruvian context | | | |
| 5.2. | Duration: 2 days | | | |
| VI. | LANGUAGES IN WHICH TRAINING OFFER CAN BE DELIVERED | | | |
| | Spanish | | | |

| | | | | |
|-------------------------|---|--|---------------|---|
| OFFERING ENTITY: | The National Institute for Research on Glaciers and Mountain Ecosystems - INAIGEM | | SDG: |  |
| ADDRESS: | Jr. Juan Bautista Mejía N° 887, Huaraz - Ancash | | PHONE: | (51-43) 221 766 |
| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Monitoring systems | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The monitoring systems allow the observation of glacier dynamics, identification of hazards such as hanging glaciers, the state of lakes, dikes, acid rock drainage, as well as the monitoring of mountain ecosystems. This information, once processed, generates studies and research, which are then prepared for the academic community and especially for those actors who are most affected by the dynamics that take place in the areas of study. In this way the actors have information for forecasting actions against dangers of glacial origin. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts. | | | <input checked="" type="checkbox"/> |
| 3.2. | Exchange of experiences | | | <input checked="" type="checkbox"/> |
| 3.3. | Internships | | | <input checked="" type="checkbox"/> |
| 3.4. | Short term training courses and seminars: 15 people, 3 days, Spanish/English | | | <input checked="" type="checkbox"/> |
| 3.5. | Studies and Joint Researches | | | <input checked="" type="checkbox"/> |
| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | |
| V. | TRAINING OFFER | | | |
| 5.1. | Name of the course offered MONITORING SYSTEMS - Drone flights and photogrammetry - Real-time monitoring, installation of communication infrastructure, low-cost video cameras and sensors, social monitoring - Processing using GIS - Academic broadcasting, DSPACE, OJS, social, video production, virtual reality | | | |
| 5.2. | Duration: 3 days | | | |
| VI. | LANGUAGES IN WHICH TRAINING OFFER CAN BE DELIVERED | | | |
| | Spanish/English | | | |

| | | | |
|-------------------------|---|-------------------------------------|---|
| OFFERING ENTITY: | Assessment and Environmental Control Organism - OEFA | SDG: |  |
| ADDRESS: | Av. Faustino Sánchez Carrión N° 603, Jesús María - Lima | PHONE: | (51-1) 204 9900 |
| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: Environment TOPIC: Environmental assessments in mining within the framework of environmental inspection in Peru | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | Environmental evaluations within the framework of environmental inspection in Peru have the purpose of determining the quality status of the different environmental components. In the case of evaluations in mining in activities that are in operation, it is necessary to identify the environmental alterations, the origin of the cause of the alterations and identify those responsible (relationship with the activity being inspected), if this is the case. Environmental evaluations within the framework of environmental inspection in Peru have the purpose of determining the quality status of the different environmental components. In the case of evaluations in mining in activities that are in operation, it is necessary to identify the environmental alterations, the origin of the cause of the alterations and identify those responsible (relationship with the activity being inspected), if this is the case. | | |

| OFFEROR ENTITY: | Assessment and Environmental Control Organism - OEFA | SDG: |  |
| ADDRESS: | Av. Faustino Sánchez Carrión N° 603, Jesús María - Lima | PHONE: | (51-1) 204 9900 |
| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: Environment TOPIC: Statistical tools for the analysis of air and soil quality data in environmental assessments in mining, energy and industry | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>Environmental evaluations in the framework of environmental enforcement in Peru have the purpose of determining the quality status of the different environmental components. Therefore, it is very important that these data are analyzed from a statistical point of view and to establish relationships between environmental variables, determine confidence intervals, regressions, time series analysis and multivariate analysis between environmental quality parameters.</p> <p>Based on the information generated from the statistical analyses, background level values for soil and sediment can be established for the purpose of assessing contaminated sites, identifying sources of air quality pollutants through multivariate statistical methods and data analysis in environmental air quality monitoring networks in the field of mining, energy and industrial activities.</p> | | |
| III. | KIND OF COOPERATION OFFERED | | |
| 3.1. | Short-term experts. | <input type="checkbox"/> | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: Environment TOPIC: Methodology for Estimating the Level of Risk from Hydrocarbon Activities | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | To date, activities have been carried out to identify sites impacted by hydrocarbon activities in the basins of the Pastaza, Tigre, Corrientes and Marañón rivers in the department of Loreto. As part of this process, an estimate of the level of environmental risk to human health and the ecosystem has been established; this estimate serves as an input for decision-making in the management of contaminated or impacted sites. The development of the topic seeks the learning and development of casuistry in the use of this methodology. | | |
| III. | KIND OF COOPERATION OFFERED | | |
| 3.1. | Short-term experts. | | <input type="checkbox"/> |
| 3.2. | Exchange of experiences | | <input checked="" type="checkbox"/> |

| OFFERING ENTITY: | Assessment and Environmental Control Organism - OEFA | SDG: |   |
| ADDRESS: | Av. Faustino Sánchez Carrión N° 603, Jesús María - Lima | PHONE: | (51-1) 204 9900 |
| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: Environment TOPIC: Social accompaniment and citizen participation as a mechanism for preventing socio-environmental conflicts within the framework of Early Environmental Assessments | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | The objective of Early Environmental Assessments is to obtain early information in mining or energy projects that are currently in an exploratory or construction stage, through a diagnosis of the main environmental components (water, sediment, soil, air, noise, hydrobiology, flora and fauna), to then be periodically monitored and identify over time the changes that could occur in their physicochemical and biological characteristics (possible alterations), in order to control the contaminating sources in a timely manner. The incorporation of citizen participation in this activity further strengthens its objective, thereby contributing to the prevention of potential socio-environmental conflicts, constituting the initial stage of a periodic environmental monitoring system that allows for the identification of changes over time in the quality of the environmental components associated with mining and oil projects, and contributing to the sustainable development of extractive activities in each zone, articulating actions between companies, civil society and the State. | | |
| III. | KIND OF COOPERATION OFFERED | | |
| 3.1. | Short-term experts. | <input checked="" type="checkbox"/> | |
| 3.2. | Exchange of experiences | <input checked="" type="checkbox"/> | |
| 3.3. | Internships | <input checked="" type="checkbox"/> | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| | 1.1. | FIELD: Environment TOPIC: Actions implemented by SENACE with Indigenous Peoples, within the framework of environmental certification | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | SENACE promotes the generation of trust among the population, and to that end has implemented good public management practices aimed at promoting the inclusion of indigenous peoples' representatives in the framework of environmental certification and citizen participation processes. With the experience gained, a SENACE Plan of Action with the indigenous peoples has been drawn up, within the framework of which actions are proposed to be developed, grouped into four thematic areas: 1) Capacity building, 2) Interculturality, 3) Legality and transparency, and; 4) Inclusion and gender equality | | | |
| III. | KIND OF COOPERATION OFFERED | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Environmental certification in SENACE's regional articulation actions | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>The Regional Articulation is a SENACE initiative that consists in the displacement of its specialists to the different regions of the country, as there are no decentralized offices. To this end, actions are developed to strengthen the technical capacities of key prioritized actors, who are given information regarding the role and functions of SENACE, the mechanisms of effective citizen participation, the procedures of environmental impact assessment and contribute to the positioning of the environmental authority.</p> <p>Likewise, from a prevention approach, the regional articulation allows SENACE to identify the possible social scenarios of the projects under evaluation, through the collection of information.</p> | | | |

| I. | ABOUT THE INSTITUTE COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Mechanisms for civil society participation in the management of Natural Protected Areas and their articulation to the territory. | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | We believe that Peru is one of the pioneering countries in terms of involving strategic actors and even other members of civil society in the management of Natural Protected Areas, where work is also done on the opportunities provided by Natural Protected Areas for local development and their contribution to the quality of life. We have a series of platforms and forms of participation with peasant and native organizations, natural resource extractors, private business sector, NGOs, among others, which have been contributing to the management of the PNA system. On the other hand, all these interventions are monitored through instruments that report and evaluate the state of participation in this system. | | | |

| I. | ABOUT THE INSTITUTE COOPERATION OFFER | | | |
| 1.1. | FIELD Environment TOPIC Benchmarking of Community Organizations. | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>Benchmarking of Communal Organizations refers mainly to the evaluation or measurement of the performance of communal organizations, having as a first step the calculation of management indicators, to then compare the results and identify the communal organization that provides sanitation services in the rural area that has the best management indicator. As the last step of this benchmarking stage, the best practices of the best community organization are identified, which led to the achievement of the performance reflected in the corresponding indicator.</p> <p>Performance improvement refers to the dissemination of the good practices identified in the previous stage of the benchmarking and the next adaptation of these good practices to the context of each of the community organisations participating in the benchmarking.</p> | | | |
| III. | KIND OF COOPERATION OFFERED | | | |

| I. | ABOUT THE INSTITUTE COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC Benchmarking of Provider Companies | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | Regulatory benchmarking is a tool used by SUNASS, to improve the performance of drinking water providers, through the identification of good practices, which aim to promote learning. It comprises mainly two consecutive components: performance assessment and performance improvement. The performance evaluation is characterized by the comparison between the providers, through performance indicators, while the second component, which depends on the first one, is characterized by the identification of good practices through the best results of the performance indicate. | | | |

| I. | ABOUT OF THE INSTITUTE COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC Supervision in corporate governance in the Provider Companies | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | Corporate governance is the system by which companies are directed and controlled, in which a link must be established between different entities, such as the company's management, its board of directors, its shareholders and other stakeholders. Similarly, transparency and accountability are essential ingredients of good management and a prerequisite for the good health of the provider companies and the satisfaction of the services provided to the users, who are the final focus of economic activity. | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Monitoring Management Goals | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>The management goals are parameters established for certain management indicators of the companies providing sanitation services, constituting compliance obligations for a five-year regulatory period. The Board of Directors of SUNASS approves the management goals of the provider companies, based on the Tariff Studies issued for each of them.</p> <p>The supervision of management goals evaluates compliance with these goals at the end of each regulatory year, based on the considerations established for them. The actions to be carried out can be done from the SUNASS headquarters or through field actions. In addition, the authorization of the programmed tariff increases depends on the progress achieved in the management goals or the fulfillment of the conditions established for them, which are also subject to analysis in these supervisions.</p> | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: "MERESE" Compensation Mechanisms for Ecosystem Water Services | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>The MERESE are mechanisms that are defined as schemes, tools, instruments and incentives to generate, channel, transfer and invest economic, financial and non-financial resources, where an agreement is established between contributor(s) and payer(s) to the ecosystem service, aimed at the conservation, recovery and sustainable use of the sources of ecosystem services. A MERESE can be designed based on one or more ecosystem services.</p> <p>SUNASS is interested in promoting the conservation of water-supplying ecosystems because the degradation of the watershed increases the cost of drinking water service and because Water Companies must have control of the raw water supply chain, avoiding: additional use of inputs, deterioration of infrastructure, plant shutdowns that cause service interruption, investment in new water sources and social conflicts. One way to link drinking water companies to their watershed and contribute to the maintenance of water ecosystem services is through the implementation of compensation mechanisms for ecosystem services (MERESE).</p> | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts. | | <input type="checkbox"/> | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Policies and standards of the drinking water regulator in small towns and rural areas | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>Given the competencies of SUNASS that were extended to the areas of small cities and rural areas, the Policy and Standards Directorate has been conducting the process of approving standards in the area of its competencies, which are based on regulatory impact analyses and research-based regulatory policies.</p> <p>In this sense, SUNASS has been developing the value chain of water and sanitation services in small cities and rural areas, which includes the analysis of diverse aspects that converge in it, such as infrastructure, technology, social and natural capital, among others. They have different characteristics from those traditionally contemplated by SUNASS in the rural environment. It is from these specifications that SUNASS has developed ad-hoc strategies for the fulfillment of its functions: auditing, regulation, of the scope of the service.</p> | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Communication for Development in Rural Sanitation | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>Communication is a management tool that contributes to the institutional objectives of the regulator. In this sense, the communication for development approach is a social process that promotes dialogue between communities and national, regional and local decision makers. "Its objective is the promotion, development and implementation of policies and programs that improve the quality of life of all people". Based on the new functions of SUNASS and the new regulatory environment in small cities and rural areas, it means working with groups of people with different cultures and customs in water management, which it is necessary to know in order to construct messages that focus on improving the quality of the sanitation service.</p> <p>The incorporation of the communication for development approach in the management of SUNASS, aims to promote positive and appropriate behaviors to improve the quality of life of people using behavioral analysis tools, as well as, achieve that the population gives value to these services through behaviors regarding payment and consumption of safe water.</p> | | | |
| III. | KIND OF COOPERATION OFFERED | | | |

| OFFERING ENTITY: | The Water and Sewerage Service - SEDAPAL | | SDG: | |
| ADDRESS: | Av. Ramiro Prialé 210, El Agustino - Lima | | PHONE: | (51-1) 317 8000 |
| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment/Water TOPIC: Strategy to implement the Master Plan of SEDAPAL using the methodology of Robust Decision Making in the Water Sector | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | SEDAPAL's mission to provide drinking water in the Metropolitan Lima area is challenged by various risks and associated uncertainties, such as rapid socio-economic growth and climate change. Currently, SEDAPAL and the World Bank are collaborating to implement an innovative methodology called Robust Decision Making (RDM) to improve SEDAPAL's planning capacity to manage potential risks. This methodology can help SEDAPAL better understand the implications of a wide range of risks and uncertainties for water security, and help improve investment plans to make them more flexible and robust for the future . | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| | 1.1. | FIELD: Education TOPIC: MELQO (National Study of the Quality of Early Education and Learning Environments) | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The MELQO is a multidimensional instrument that provides an accurate and reliable measurement of child development and the quality of preschool environments. This instrument has been specially designed to be used as a monitoring tool at the national level in lower-middle income countries. Thus, as a monitoring tool at the national level, it makes it possible to make diagnoses at the population level and to compare trends in characteristics among different groups, with respect to the quality of learning environments in early education, children's developmental skills and the impact of learning environments on child development. To this end, MELQO is organized into two measurement modules: the Learning Environment Quality Module (MELE, for its ODSs in English), which measures infrastructure and materials, pedagogical approaches and curricular activities; and the Child Development and Early Learning Module (CDL, for its ODSs in English), which assesses early math, communication, social-emotional, motor and executive function skills. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| | 3.1. | Short-term experts. | <input type="checkbox"/> | |
| | 3.2. | Exchange of experiences | <input checked="" type="checkbox"/> | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Education TOPIC: Innovation for educational policy | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>MineduLAB is the laboratory of cost-effective innovation that allows learning through the design, implementation and rigorous evaluation of experimental pilots that seek to prove the effectiveness of cost-effective innovations to nurture educational policy. MineduLAB identifies low-cost innovation proposals that address priority problems in the education sector. The proposals come from researchers, areas of MINEDU and the private sector, and respond to the needs of the educational community; for example, lack of parental involvement, gaps in learning, teacher absenteeism, among others. These proposals are prioritized according to their viability, relevance, pertinence and evidence of impact. Thus, the laboratory is constituted as a useful and sustainable solution, which understands the need of the public official to have timely evidence to improve educational services, and which generates rigorous and empathetic innovations with the needs of the educational community.</p> <p>MineduLAB has managed to build a portfolio of fourteen innovations since 2015 (to date), nine of which have already been completed, and three are in the design stage and two in the implementation stage. The innovations achieved diverse impacts on indicators such as learning achievement and school management, reduction of drop-out rates, motivation of principals, etc. In sum, this tool is an innovative and disruptive proposal that allows for the design and implementation of low-cost "out of the box" ideas that seek to improve educational services and has demonstrated, for example, that it is possible to improve learning with an investment of less than US\$1 per student.</p> | | | |

| 1.1. | FIELD: Education TOPIC: "Traffic light school" management tool | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>"Traffic light school" is a management tool that aims to provide reliable, regular and timely information on the delivery of educational service, in order to implement actions to improve education policy in the short and medium term. In that sense, "Traffic light school" visits and collects information monthly in a sample of public educational services.</p> <p>Based on the information collected, periodic reports are prepared and presented with the results of indicators related to the management of the education service, the delivery of educational inputs, and the condition of the infrastructure, among others. These results are made available to the IGEDs, enabling them to learn about the management and conditions under which the educational service is provided on school premises, as well as to monitor the main interventions and implementation of educational policy measures.</p> | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Education TOPIC: School coexistence, prevention and care of violence against children and adolescents | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>Since September 2013, the Ministry of Education has had a specialized system for reporting cases of school violence called SiseVe, with the aim of ensuring that educational institutions deal with cases of violence against students in a timely manner. It also alerts decentralized education management bodies (DRE/GRE/UGEL) to situations of violence between students and from education institution staff to students, enabling collaborative and interconnected work at the national, regional and local levels.</p> <p>The SiseVe portal allows any person (victim or witness) to report a case of school violence. To do so, they can use the website (www.siseve.pe), the mobile application (SiseVe app) or call the toll-free number 0800-76888, which has a team of professionals (psychologists and lawyers) who provide guidance and support for reporting cases, follow up on what EI has done in the case of violence, and make referrals to institutions that are part of the NNA protection system.</p> | | | |

| OFFERING ENTITY: | The Ministry of Women and Vulnerable Populations - MIMP General Directorate against Gender Violence | | SDG: | |
| ADDRESS: | Jirón Camaná 616, Cercado de Lima | | PHONE: | (51-1) 626 1600 |
| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Gender Equality TOPIC: Prevention of gender-based violence in business organizations | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>Private enterprise is a key space for promoting measures to prevent violence and discrimination against women because it can accommodate workers living in situations of violence, as well as men who exercise violence against women. In addition, as areas of interaction between men and women, it is possible that in companies relations are established that reproduce stereotyped roles for men and women that ultimately tolerate or justify violence against women. The actions that companies take to prevent violence can be framed in the internal policies of personnel welfare, as well as in the strategies of social responsibility. The actions that companies take to prevent violence can be framed in the internal policies of personnel welfare, as well as in the strategies of social responsibility.</p> <p>Although violence and discrimination have long been considered a social problem, in recent years companies have begun to become aware of their negative impact on their economies. In this sense, it is important that the public sector establish alliances with the private sector so that the latter joins the compliance of public policies for the eradication of violence in all its forms. Regarding the experience of the Certification Mark, in 2013, 24 companies were presented, in 2015, 43 were presented, in 2017, 61 were presented and in 2019, 433 companies were presented. This means that companies have an interest in having safe spaces for their staff and fighting violence.</p> | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Gender Equality TOPIC: Sexual harassment as a manifestation of gender-based violence | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>Sexual harassment is a form of violence, which takes the form of conduct of a sexual or sexist nature or connotation that is unwanted by the person against whom it is directed, which may create an intimidating, hostile or humiliating environment; or which may affect their work, educational, training or other activities or situations. In these cases, it is not necessary to prove the rejection or the reiteration of the conduct. Sexual harassment or sexual harassment in the workplace is a current issue because of its name. However, it is known that it is an old and widespread reality, which has appeared since the incorporation of women into the labor market, who have been mostly affected by such behavior.</p> <p>The problem of sexual harassment in Peru is increasingly recognized as an important discrimination that affects equal opportunities for women, who are the main victims, with special vulnerability for divorced, separated or widowed women, single mothers, newcomers to the labor market, women with irregular employment contracts, women with disabilities, those from ethnic minorities and immigrants.</p> | | | |

| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>In 2009, the Registry of Femicide of the Public Prosecutor's Office was created in order to manage official, verifiable and contrastable information on the incidence of femicide in Peru (gender-based homicide) and to contribute to institutional decision-making processes in the areas of prevention, prosecution of crime and protection of victims. Thus, under a criminological approach, the characteristics of the victims, the accused and the crimes are analyzed by posing five key questions: What, when, where, who and how; which, when answered, allow an approximation to be made of the characterization of the criminal acts and violence, based on the identification of some basic variables, among which are the antecedents of family violence and protection measures.</p> <p>In order to strengthen the Registry, the Program for the Implementation of Criminological Investigations and Prospective Analysis was created to include other related topics in the analysis of crime. In the same year, the business intelligence (BI) tool and predictive analysis (data mining) were included in the model, thus allowing early warnings to be generated for prosecutors about possible femicide victims.</p> | | |
| III. | KIND OF COOPERATION OFFERED | | |
| 3.1. | Short-term experts. | | <input type="checkbox"/> |
| 3.2. | Exchange of experiences | | <input checked="" type="checkbox"/> |
| 3.3. | Internships | | <input checked="" type="checkbox"/> |
| 3.4. | Short term training courses and seminars | | <input type="checkbox"/> |
| 3.5. | Studies and Joint Researches | | <input type="checkbox"/> |
| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | |
| | <p>Triangular Project between El Salvador, Peru and Spain - Institutionalization of an information system that contributes to the qualitative and quantitative analysis of the phenomenon of Femicide Violence: Exchange of experiences between representatives of the Public Ministry of Peru and institutions of the Salvadoran justice sector, through the development of technical missions, with the objective of contributing to the reduction of impunity in cases of violence against women, especially femicide violence, in all its forms, through public policies for women's access to a life free of violence. Institutional capacities strengthened through knowledge of the experience of the Public Prosecutor's Office of Peru, for the creation of a single registry of victims of femicide violence that will contribute to the design, implementation and evaluation of public policies for a life free of violence for women Coordination and multisectoral cooperation established for the creation of a single registry of victims of femicide violence that will contribute to the formulation of public policies on citizen security and criminal prosecution of violence against women. Design of a methodological model for criminological analysis to monitor cases of violent deaths of women</p> | | |
| V. | TRAINING OFFER | | |
| 5.1. | Name: Femicide Registry | | |
| 5.2. | Duration: To be determined with the institution concerned | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Disaster Risk Management TOPIC: Sustainable housing construction methodology, with social participation | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | Two types of low-cost housing construction are being carried out in the country to meet housing needs. One in the rural area under the direction of an executing nucleus and, the other, in the urban area, through the MiVivienda Program called Techo Propio, the latter emphasizes individual housing and grants a bonus. The first is donated by the government to the beneficiaries and the second grants a bonus and a 15-year soft credit. The methodological study of a new modality has been concluded, in addition to the two previous ones, with the contribution of the beneficiaries' labor, previously trained, contributing to mass housing construction in five-story buildings. In this case, it is also proposed to grant a 15-year soft loan. | | | |

| I. ABOUT OF THE INSTITUTION | | | | | |
| 1.1. | | FIELD: Disaster Risk Management TOPIC: Seismic Engineering / Web consulting service for the determination of the seismic hazard in the national territory | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | | |
| SENCICO offers the Web Service of consultations for the determination of the probabilistic seismic danger in the national territory, elaborated from the analysis of the data of the seismic catalogue updated until January 1, 2016. The seismic hazard information provided includes: Annual Probability of Overrun vs. Spectral Acceleration curves, for periods from T=0.0 seconds to T=3.0 seconds, in 0.1 second increments, and for critical dampings ranging from 2 % to 10 %, in a mesh with 0.10° geographical degree resolution Uniform acceleration hazard spectra for 475 years, 2500 years and any other return period Seismic design spectra determined taking into consideration the E.030-2016 Seismic Resistant Design Standard (considering both generic Z values according to the zone, as well as specific "Z" values obtained from the seismic hazard calculation) and seismic design spectra determined according to ASCE/SEI 7 (2010) referring to buildings. | | | | | |
| III. KIND OF COOPERATION OFFERED | | | | | |

| I. ABOUT OF THE INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Disaster Prevention and Reduction TOPIC: Rainfall and sediment management model. | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| The occurrence of the El Niño phenomenon, until a decade ago, was on average once every 8 years, and its presence was verified for approximately four months. As a result of climate change, the duration of rainfall has been shortened, but its intensity has increased considerably. Immediate contingency work has been carried out, such as the "water route", an experience acquired in 2018. In this context, the so-called "Water Route" established in 04 districts of the city of Trujillo has the purpose of channeling a probable avalanche That would treat not only water, but also sediments. | | | | |

| 1.1. | FIELD: Disaster Prevention and Reduction TOPIC: Evaluation of preparation capacity - EPCI. | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| In the Sendai Framework, it considers as priority 4 the Enhancement of disaster preparedness for effective response and "Building back better" in recovery, rehabilitation and reconstruction. In Peru, this priority is an objective within the Plan. INDECI, in compliance with this priority, has been preparing for three years the Study of the Capacity Index for Emergency and Disaster Preparedness - EPCI of the entities that make up the National System of Disaster Risk Management (SINAGERD). EPCI measures the level of preparedness achieved by SINAGERD entities to face emergencies, for which six key components are studied to measure preparedness: Planning, Organization; Human Resources, Financial Resources, Logistics and Communications, using World Food Programme methodology. | | | | |

| ADDRESS: | Jr. Carabaya Cdra. 1 S/N, Palacio de Gobierno Cercado de Lima - Lima | | PHONE: | (51-1) 219 7000 |
| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: State and Governance TOPIC: Affidavit of Interest Platform | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>The Affidavit of Interest is an application that uses the digital principle from the design and seeks to make transparent the family, corporate, commercial and labor ties, among others, of the officials, public servants and obligated subjects. Thanks to this transparency, the State can detect and prevent conflicts of interest, which allows to build a culture of integrity in the public sector and honesty. The Affidavit of Interest is presented virtually through the Single Platform of Affidavit of Interests (https://dji.pide.gob.pe) and is signed digitally. It is relevant, scalable, available and interoperable. It works efficiently and with a transversal approach. (See: Emergency Decree 020-2019 - Emergency Decree establishing the mandatory filing of the Affidavit of Interest in the Public Sector)</p> | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| | 3.1. | Short-term experts. | <input type="checkbox"/> | |
| | 3.2. | Exchange of experiences | <input checked="" type="checkbox"/> | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: State and Governance TOPIC: Interoperability in Public Administration | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>The Peruvian State has promoted interoperability since 2011 and it is a digital tool that improves its own internal efficiency and the relationship with citizens. It is important to note that, initially, the provision of information between entities was not mandatory. Later, in a second moment, it became mandatory (counting with 210 web services to date). This is in order to interact and interconnect between diverse organizations and to achieve the joint objectives for electronic data exchange between their respective systems.</p> <p>In Peru, we have a Platform for Interoperability of the Peruvian State -PIDE that streamlines the completion of procedures for the citizen or user with relevance and allows the reuse of data and functionality achieving efficiency that results in a reduction of costs with a cross-cutting approach. (See: Legislative Decree 1246 and amendments).</p> | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: State and Governance TOPIC: Documentary Management Model | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The Document Management Model is a reference framework for implementing and maintaining adequate, transparent and reliable document management in a public entity. The implementation of this framework leads to a strategy of progressive implementation of document management for the exchange of electronic documents with legal value between entities and, subsequently, to citizens or companies. The Document Management Model has a transversal approach streamlining electronic document schemes technically and legally valid (known as the zero paper), protecting the environment. (See: Legislative Decree 1310 and Resolution of the Secretariat of Digital Government N°001-2017-PCM/SEGDI, which approves the Documentary Management Model within the framework of Legislative Decree N° 1310) | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: State and Governance TOPIC: Dialogue and Sustainability / Prevention of Social Conflict | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>The Secretariat of Social Management and Dialogue is the line organ with technical normative authority at the national level, responsible for the matters of prevention, management and solution of controversies, differences and social conflicts; it is also responsible for conducting the processes of dialogue, mediation, negotiation, among other mechanisms, with the diverse social actors, representatives of private institutions and public officials to contribute to the solution of controversies, differences and social conflicts, with the purpose of consolidating a culture of peace, respect for human rights and other democratic values for sustainability and the defense of the rule of law.</p> <p>To this end, the Undersecretariat for Dialogue and Sustainability has designed a methodology for conflict prevention, focusing on the prospective analysis of events with the possibility of escalation, as well as designing scenarios for conflict mitigation.</p> | | | |

| IV. PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | | |
| <p>Brazil, Chile, Colombia, Costa Rica, Dominican Republic, Ecuador, El Salvador, Guatemala, Mexico, Panama, Paraguay and Venezuela: Course on Ethics in Public Service. Participants are able to identify and understand the ethical concepts and principles of public service and apply them in a critical and reflective manner in the evaluation of situations typical of their work performance, proposing possible improvements aimed at generating public value and offering a better service to citizens. Participants can recognize their capacities as moral persons who deliberate, make decisions, have ethical discernment and reflect on ethics as practical knowledge in their personal and social environment. Participants have improved their knowledge in relation to fundamental concepts for public service such as human dignity, citizenship, democracy, pluralism. Likewise, they have identified their relationship with the correct performance of the public system and the value of their role as servants and representatives of the State. The participants have identified fundamental concepts that contribute to the regulation and self-regulation of situations of corruption in their personal and work environment, and have become more aware of the importance of their role as promoters of integrity. The ENAP of SERVIR, manager of the course, contributed to the institutional strengthening of entities at the Latin American level, sharing with them a course designed from the Peruvian public service, positioning the School as a valuable nucleus for the development of capacities with regional impact.</p> | | | | |

| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | |
| | <p>Colombia, Cuba, Dominican Republic, Ecuador, El Salvador, Paraguay, Uruguay, Venezuela. Course of Service-Oriented Architecture. The participants are able to design a general plan for the implementation of SOA technology in their institutions, based on the understanding of its key elements, its practical use, its problems and the impact it can achieve, sharing its vision of application as a strategic element, seeking to increase efficiency, in order to achieve better services to citizens. The participants can execute the design of services with characteristics that drive organizational agility, reduce operating costs in the areas of information technology and increase the return on investment. Participants have improved their knowledge of e-government, generating immediate benefits for public administration, improving interoperability between entities and access to cutting-edge services by citizens. Participants have learned about the experiences of other countries in the region in the implementation of technological projects and have exchanged ideas and analyses that contribute to their training. The participants have formed a network of contacts with civil servants from other countries, which allows them to create spaces for continuous learning and permanent exchange of ideas and projects. This exchange, in turn, helps to make them aware of the cultural differences between countries and the value of diversity.</p> | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| | 1.1. | FIELD: State and Governance TOPIC: Human Resource Management, Civil Service Tribunal | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>The Civil Service Tribunal – TSC (by its acronym in Spanish) is an integral part of the National Civil Service Authority (SERVIR, by its acronym in Spanish) whose function is to resolve, with technical independence, disputes between public servants and the entities belonging to the national government for which they provide services in matters of: access to civil service, disciplinary regime, evaluation and career progression, and termination of employment. As of 1 July 2016, it resolves appeals from regional and local governments only in disciplinary matters. In other matters, jurisdiction will be progressively extended.</p> <p>During the experience of solving the above mentioned resources, the TSC noticed the difficulties of the public servants from all over the country to access the information contained in their files; which generated the initiative to implement with technologies and processes the "Digital File of Free Access of the Civil Service Court" (EDLA-TSC, by its acronym in Spanish), in order to allow the content of the files to be available to the public for the purposes they deem appropriate, in the place and at the time they require it with transparency, security, immediacy and integrity, generating, in addition, savings in time and economic resources.</p> <p>This has been identified as Good Practice in Public Management 2019.</p> | | | |

| 1.1. | FIELD: State and Governance TOPIC: Human Resources Management, Civil Service Reform | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>The National Civil Service Authority - SERVIR is a public entity attached to the Presidency of the Council of Ministers (PCM) that has among its main mandates to implement the Civil Service Reform, to modernize public institutions (adapting them to the decentralization process, professionalizing the civil service and strengthening human resources offices).</p> <p>SERVIR defines implements and supervises policies for the management of personnel at the service of the State (approximately 1'400,000 public servants in more than 2,000 public entities at the three levels of government). The Inter-American Development Bank (IDB), through the "Institutional diagnosis of civil service in Latin America: Peru ", highlighted the progress of the Civil Service reform given that in four years (2011-2015), Peru advanced more than other countries in Latin America in making improvements in its civil service by going from 29 to 41 points, on a 100 scale. The Civil Service Management Policy Management provides technical assistance in the design and implementation of Civil Service Reform .</p> | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Technological innovation TOPIC: Technology and Innovation Support Centres (CATI Network) | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>The CATI Peru Network is an alliance of 32 public and private institutions (and 15 more to join in the short term) that was formed in Peru, with the support of the World Intellectual Property Organization - WIPO, to promote and facilitate access by local researchers and innovators to patent-based technological information services, as well as other value-added services linked to intellectual property.</p> <p>Through this initiative, INDECOPI hopes to move towards the development of local institutional capacities so that patent services (and intellectual property services in general) are provided in a more decentralized manner in favor of research, invention, innovation and technological entrepreneurship activities throughout the country. INDECOPI's main task in the CATI network is to contribute to the strengthening of the intellectual property of network members through capacity building programs.</p> | | | |

| I. | ABOUT OF THE INSTITUTION OFFER COOPERATION | | | |
| 1.1. | FIELD: Control of Unfair Competition TOPIC: Advertising of influencers (influencers) | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>Within the framework of the digital economy, advertisers have resorted to the figure of opinion leaders (influencers) to promote their products or services through digital media, due to their massive reach to consumers and the general public (companies), given the proximity of opinion leaders (influencers) to their followers.</p> <p>As it is advertising, its dissemination is subject to respect for established advertising parameters, in order to ensure the correct functioning of the market and the protection of the consumer. In this regard, INDECOPI has published an "Advertising guide for opinion leaders (influencers)", an information tool that provides recommendations to opinion leaders (influencers) and advertisers to disseminate information in a transparent and sincere manner for publications that constitute sponsored. In this sense, the training will consist of addressing this innovative form of advertising and developing the implications and regulatory framework governing the advertising of opinion leaders (influencers).</p> | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: Consumer Protection TOPIC: National Integrated Consumer Protection System | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | Provide technical assistance or training for professionals on the implementation of a National Consumer Protection System as an example of institutional design favorable to consumer protection. A system implies establishing a set of principles, rules, procedures, techniques and instruments aimed at harmonizing public policies in order to optimize the actions of the State administration to ensure compliance with the rules of consumer protection and defense throughout a country. Currently in Peru, INDECOPI is the National Authority for Consumer Protection, leading the system and coordinating with different state and private actors of the National Policy for Consumer Protection and Defense, as well as the National Plan for Consumer Protection. It is proposed to address the experience from Peru on the functioning of this system so that it can be replicated. | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Work TOPIC: Technical Assistance for the operational development of prevention, advice, promotion and dissemination of the Labour Inspection System in Commercial Conglomerates | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| Prevention of non-compliance with occupational and social-labour safety and health regulations, the main topics being occupational safety and health and labour formalization. Thus, this strategy seeks to contribute to the protection of workers by minimizing the dangers and risks of work, to the extent that it is reasonable and feasible, with a view to helping prevent injuries, illnesses and deaths caused by work and to promote safety and health in the workplace. It also seeks to disseminate the fact that formal work represents a decent income and social protection for workers and their families, leading to a better quality of life, social and economic progress, poverty reduction and social equity. | | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | | FIELD: Work TOPIC: Inspection and Guidance Actions / Dissuasive Letters and Guidance Letters | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| Exchange of experiences about send of Dissuasive Letters, which are communications through which employers are warned, during the previous intelligence stage, about the presence of inconsistencies (differences or omissions) detected based on the information declared in the electronic form, and other sources of information, with the purpose that said employers voluntarily regularize their social and labor obligations, especially the registration of their workers in their electronic form, having to prove in a documented manner the response to said exhortation, in order to lift the inconsistencies previously detected. Likewise, exchange of experiences on the remission of Guidance Letters, which are also communications made in order to comply with the guidance work on the Social and Labor Standards, Safety and Health at Work or Fundamental Labor Rights. In these communications, information related to the subject matter of the letter is attached, such as brochures, leaflets, etc., and/or some e-mail addresses are indicated where more information on the subject can be found. In some letters, a checklist is also considered to be filled out to measure the learning outcome of the recipient of the communication, which must be presented physically to the entity or filled out online through a link provided. | | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Culture TOPIC: Educational activities to complement the Museum's exhibition | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| The Regional Museum of Ica "Adolfo Bermúdez Jenkins" has experience in defining specific themes to be dealt with from an exhibition with the respective preparation of diverse educational activities of a recreational nature. Therefore, taking advantage of the wide free opening of the Museum arranged by the Ministry of Culture, we develop this type of activities for the general public. These are prepared in relation to different themes that are treated in turn with the aim of bringing the visitor closer to the knowledge of the cultures that are exhibited in the Museum and on the different values of the Cultural Heritage Furniture on display. Thus, visitors arrive at the museum and begin their visit through the exhibition rooms, generally being informed by our staff and/or volunteers, who emphasize the theme chosen for the Sunday in question. The theme is discussed during the tour taking as a reference the cultural assets that are part of the exhibition. At the end of the tour of the rooms, visitors leave and participate in different games related to the theme, prepared especially by the museum staff. | | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Culture TOPIC: Digitization of Cultural Heritage through interactive media | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| Use new technologies to bring all Peruvians to different cultures. What has not allowed us to position our museums as innovative places that use technology to improve the visitor experience also constitutes a replicable solution to all museums. Our goal is to help more Peruvians enjoy our culture, we seek to make available to all citizens the necessary technological elements and according to current trends that contribute to bringing citizens closer, especially to the so-called new public, children and young people who are familiar with technology as they are massive users of technological equipment. Interactive media has been implemented in order to provide improvements for the citizen and the cultural sector. Some of these innovation projects are mentioned below, such as Virtual Visits, Data Capture through WI-FI, Immersive Experiences, Digital Memories, Use of Text Message, Holographic Pyramids, and Mobile Application “MUSeamos”. | | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Culture TOPIC: Definition of territorial limits for declaration and management of heritage areas | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| Peru is still in the process of defining the political administrative boundaries (departmental, provincial and district), moreover the establishment of the areas that make up the peasant communities or native peoples have been pending for decades, this is a limitation in the declaratory processes and subsequent management of heritage areas. An internship is proposed with the purpose of identifying the limitations due to the lack of definition of territorial limits when selecting patrimonial territories, seeking solution and participation strategies both in the declaratory procedures, as well as in the subsequent management. | | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | | FIELD: Culture TOPIC: Intangible Cultural Heritage, Traditional Arts | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>Share experience of Ruraq Maki, handmade program, a state program for research, registration, promotion and dissemination of ancestral knowledge related to traditional art. This programme was created in 2007 with aim of ensuring that the traditional artistic knowledge of rural families and communities - especially indigenous peoples - is not only revalued and maintained, but also generates opportunities for development and social and economic inclusion. The research makes it possible to register, publish and develop the exhibition-sale of traditional art that brings together twice a year, during 1A to be determined with the interested institution, more than 150 collectives of artisans in the country, linking them to new markets. In addition, this programme includes a training axis aimed at artisans that favours the formalisation and autonomous management of their production. For a year now, the programme has had virtual shops, which is the first virtual platform for electronic commerce in crafts created by a Latin American State.</p> <p>At the request of various countries, this experience has been presented at forums on intangible cultural heritage in Mexico (2018), Ecuador (2019) and Colombia</p> | | | | |
| III. KIND OF COOPERATION OFFERED | | | | |
| 3.1. | | Short-term experts. | <input checked="" type="checkbox"/> | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Transport and Communications TOPIC: Digital Terrestrial Television (DTT) and Broadcast Emergency Warning System (EWBS) | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| The Emergency Warning Broadcast System (EWBS) is one of the advantages of the ISDB-T standard. This system uses the digital terrestrial television (DTT) signal to bring an emergency disaster-warning signal directly to the population. In Peru, disaster information is processed via telephone, radio or e-mail, with the probability of communication interruption when a major disaster occurs. However, the EWBS is another alternative that allows the population to receive faster, more accurate and stable information about the disaster emergency, thus contributing to mitigate damages and save lives. | | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Transport and Communications TOPIC: Analysis of determinants of occurrence of fatalities in traffic accidents on national roads | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The Superintendence of Land Transport of Persons, Cargo and Freight (SUTRAN) has the function of regulating, supervising, controlling and sanctioning the activities of the transport of persons, cargo and freight at the national and international levels. In this way, with the purpose of improving the conditions of the service of transport of people, load and freight, in a context in which the occurrence of traffic accidents with fatal consequences has been increasing in the country, the institution has been developing studies that allow to identify elements that condition and harm the life of the users of the terrestrial transport services and pedestrians, and that in turn serve as evidence for the implementation of actions to mitigate these scenarios. Within this framework, the study "Analysis of determinants of occurrence of fatalities in traffic accidents on roads nationwide" will be an important source of information for the design of public policies that focus on reducing the occurrence of this type of accident in order to safeguard life. | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: HEALTH TOPIC: Financial Inclusion and Education in Together / National Program Together | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>The Juntos Program bases its actions on financial education, understood as awareness and generation of confidence of users in the use of financial tools, seeking that population accesses financial services based on knowledge of processes of payment, savings and consumer protection, in a sequential and responsible manner. The activity is developed in the 21 territorial Units through local managers, who are trained and through the cascade effect, replicating what has been learned with users, making use of financial education materials developed, thus strengthening knowledge of users in the use of basic financial tools.</p> <p>Among results of Inclusion and Financial Education as of October 2019, it has increased to 1,383 points of payment (channels of attention for the withdrawal of their incentive) through modality of correspondent agents (722), thanks to a joint work with National Bank of Peru, reducing time and cost of transfer of users to a point of payment, which has allowed to decongest the attention in the agencies of the Bank, improving quality of attention to our users.</p> | | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Development and Social Inclusion TOPIC: Social Innovation | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>The Ministry of Development and Social Inclusion (MIDIS) of Peru promotes social innovation through its social innovation laboratory - AYNI Lab Social. MIDIS seeks to ensure that social innovation agenda is aligned with the needs of Ministry's target population (poor and vulnerable population). In that sense, the AYNI Lab Social team has developed a methodology that allows for collection of needs that the population has, through workshops to collect needs with social programs team. In this way, "bottom up" innovation is promoted where beneficiaries of innovations are both leaders of the innovation process and its users, thus guaranteeing that the innovation is contextualized to identified need.</p> <p>These workshops use design thinking as the main tool to obtain information that will allow the development of the Ministry's innovation agenda.</p> | | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Development and Social Inclusion TOPIC: Geo-referencing tool for monitoring Social Programmes | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>Since the beginning of operations, Pension 65 has faced serious difficulties in carrying out processes of location, identification and verification of users (collection of pensions and prevention of leaks), as well as efficient management of personnel and other assigned resources. The programme's user community lives predominantly in peri-urban and rural areas, in homes that cannot be easily located. Therefore, quantifying the personnel needed for field work and organizing it efficiently became an excessively complex task that was carried out with low levels of efficiency and effectiveness (as an example, in 2013, out of the total number of users, 306,298, only 4,479, or 1.5% of the total, made home verification visits).</p> <p>In order to improve the performance of these processes, Pension 65 developed computer tools called AYZA and SISOPE, which make use of geo-referencing systems, which have made it possible to better identify and locate users, manage socioeconomic information at a personalized level, keep a user database updated by verifying their socioeconomic situation, and also better organize staff and optimize the use of other resources such as mobile units, fuel, etc. This will improve the routes taken by field staff and location of user population, optimizing time and costs, and by beginning of December 2019 there were 431,653 verified users out of a total of 557,043 thousand, which is 77% of the total.</p> | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Development and Social Inclusion TOPIC: "Productive Knowledge" Intervention Model | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>Pension 65, in the search to design a complementary intervention to economic subsidy, that meets the social-emotional, participation, and protection needs of elderly; formulated a cultural rescue and identity strengthening strategy, as an opportunity for elderly population to be integrated into social and cultural dynamics of their communities. Within this framework, Productive Knowledge arises, an intervention that revalues the older adult population in a situation of vulnerability, as bearers of traditional knowledge and ancestral practices, which are assets of their community and allow the generation of local development processes, through rescue and appreciation of their cultural wealth, by means of the registration and transmission of knowledge to the younger generations.</p> <p>Productive Knowledge has a participatory and intercultural approach, and seeks to contribute to well-being of older people by revaluing their role as bearers of knowledge, such as oral traditions, agricultural techniques, traditional medicine, and crafts, among others, which become productive when identified as community assets. It is aimed directly at elderly population in a situation of extreme poverty and, indirectly, at educational institutions, students and communities that benefit from the knowledge recovered and in process of transmission; which began in February 2013 in the districts of Sarhua and Los Morochucos, in the department of Ayacucho. To date, 73,107 users of the program participate in the intervention Productive Knowledge and 661 local governments implement intervention, and have a basic team of officials trained in Productive Knowledge.</p> | | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: Development and Social Inclusion TOPIC: Intervention model of the Day Care Service for Vulnerable populations | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>Social intervention model aimed at children, adolescents and older adults in vulnerable situations who require day care services. In view of the poverty in which parents live, they have to work and their children are exposed to a situation of lack of protection, since they are left without care. Faced with this reality, the Peruvian State has been implementing the social intervention model developed in the CEDIF.</p> <p>The experience of the social intervention model developed in the CEDIFs is framed in two budgetary programmes. The Budgetary Programme N° 142 Specialized attention to older people and the Budgetary Programme N° 117 Timely attention to children and adolescents in a presumed state of abandonment. Children, adolescents and older adults who participate in the Social Intervention Model receive a set of interventions aimed at their comprehensive development, in the form of day care. At present, an average of 5,062 children and adolescents are being cared for each month, and in the case of older adults, that is to say 1,067.</p> | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Development and social inclusion TOPIC: Model of multidisciplinary intervention in children and adolescents without parental care or at risk of losing them. | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>The Child and Adolescent Protection Services Unit has provided care to 3,515 children and adolescents in need of family protection this year through its 49 residential care centres of three types (2,331 children and adolescents in the basic care centres, 411 children and adolescents in the specialized care centres and 773 children and adolescents in the emergency care centres) throughout the country.</p> <p>The intervention in the CAR consists of the integral attention of the basic needs of the children (housing, education, food, health and clothing) and the attention to the needs of emotional and social support. All this is done through the work of a multidisciplinary team made up of social workers, psychologists and educators who, together with the permanent care staff (people responsible for the care and attention of children and adolescents) and support staff, implement the Individual Work Plan with the aim of family reintegration.</p> <p>This year (Jan-Nov) 983 children were discharged through family reintegration, 291 through foster care, 133 through social reintegration and 18 through adoption.</p> | | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Development and social inclusion TOPIC: Model of integral attention directed to the older people in situation of vulnerability and social risk | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>A model of comprehensive care aimed at older adults in situations of vulnerability and social risk, with a human rights-based, gender, intergenerational and intercultural approach. INABIF has an Elderly People Protection Services Unit - USPPAM, which is the organizational unit responsible for programming, conducting, coordinating, executing and supervising the prevention, promotion and protection actions of older adults in situations of vulnerability and social risk, of the services in charge of the Programme, at national level. In addition, since INABIF has taken over the Vida Digna National Programme through Supreme Decree No. 002-2017-MIMP, various articles of the INABIF operations manual have been amended by Ministerial Resolution No. 190-2017-MIMP of 4 July 2017. These add functions to USPPAM relating to basic care services, night care centres and the restoration of rights for PAM living on the streets.</p> <p>Its purpose is to contribute to the improvement of their quality of life by informing and raising the awareness of the family and the community so that they can exercise their protective role and treat them with dignity. Its work is carried out through the promotion and articulation of public-private efforts in order to provide personalized and specialized attention to the elderly, in preventive-promotional aspects, orientation, counselling and/or social, psychological, legal and health referral. It uses the strategy of campaigns, service provision fairs and capacity building, among others.</p> | | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Archives TOPIC: Archives Management | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>Archives Management is a principal function of any institution, whether public or private, since it allows for the adequate administration of archival documents that are the result of the functions, activities and processes carried out by the entity. Therefore, the safeguarding of these documentary evidences is of special importance both for the entity and for the public it serves or attends.</p> <p>Archive Management therefore adequately supports the entity since it backs up its rights and obligations through documentary evidence, allowing access to it and decision making, all of which is combined with the use of technological tools that contribute to its access in real time and allow it to go through a process of generating digital microforms with legal value, which would lead to having a copy with all the characteristics of the original document, allowing the operational continuity of the entity in the face of any incident and optimizing spaces before the elimination of physical documentation.</p> <p>The above is based on having properly developed the archival processes of organisation, description, assessment, conservation and archival services and having developed the instruments for archival management such as the Classification Chart and the Archival Documents Control Programme.</p> | | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Documentary Management TOPIC: Digital Microforms | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>Document Management with Digital Microforms contributes with administrative simplification and modernization to digital systems; considering that the application of computer tools for document management favours the elimination of the use of paper in management, contributing to the delivery of an agile and safe service for the internal benefit and the citizens it serves. This leap from the paper era to the digital era makes it possible to prepare, review, modify, send and follow up administrative documents using standardized templates, in lightweight formats (PDF), in addition to interconnecting the information to all the institution's decentralized offices by making the documentation available online, from wherever they are, with Internet access.</p> <p>To the extent that this latest technological innovation uses the digital signature generated within the framework of the Official Electronic Signature Infrastructure through digital certificates issued by an accredited Certification Entity, it becomes necessary to have a service that implements a platform that allows the authentication of digital or digitized files through the generation of digital microforms with legal value.</p> | | | | |

| OFFERING ENTITY: | National Superintendency for the Control of Security Services, Arms, Ammunition and Explosives for Civilian Use – SUCAMEC | SDG: |  |
| ADDRESS: | Jr. Contralmirante Montero 1050 (antes Av. Alberto del Campo) Magdalena del Mar - Lima - Perú | PHONE: | 412-0000 |
| I. | ABOUT INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: Management of Arms, Ammunition and Related Items (GAMAC) TOPIC: Process of identification, classification, verification and monitoring for the destruction of firearms | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | Make known the current normative framework that regulates the final destination of firearms through the process of destruction (melting). This action contributes to the eradication of irregular and illegal weapons that were in the possession of criminals and organized crime by promoting the disarmament process and preventing the proliferation of illicit arms trafficking. | | |
| III. | KIND OF COOPERATION OFFERED | | |

| ADDRESS: | | Jirón Ucayali 394 – 398, Lima | PHONE: | (51 1) 311 0300 |
| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: State and Governance o TOPIC: Integrity and fight against corruption | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>In April 2018, the National Plan of Integrity and Fight against Corruption 2018 - 2021 was published, including a model of integrity as a strategy to prevent corruption to be implemented in all public institutions of the Peruvian State.</p> <p>It is a strategy designed in the light of international standards and good practices gathered from international cooperation in order to improve the organization of public administration to promote integrity and fight corruption. The model contains 9 components, 49 sub-components and 97 suggested actions to be implemented in public entities.</p> <p>The purpose of the technical offer is to transmit the Peruvian experience in the process of implementing the integrity model in the ministries of the Executive Branch, as well as the challenges that the sectors have been facing in the development of this prevention strategy and that can serve as a reference to other countries that are developing strategies and tools to fight the scourge of corruption.</p> | | | | |
| III. KIND OF COOPERATION OFFERED | | | | |

| OFFERING ENTITY: | | National Commission for Aerospace Research and Development –CONIDA | SDG: |  |
| ADDRESS: | | Av. Luis Felipe Villarán 1069, San Isidro, Lima | PHONE: | 576-3920 |
| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Space Sciences TOPIC: High Energy Particle Detection | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>The CONIDA, through the Astrophysics Directorate, participates in the LAGO (Latin American Giant Observatory) project, an Astroparticle Observatory extended on a global scale. It is mainly oriented to basic research in three branches of astroparticle physics: the extreme universe, space weather phenomena and atmospheric radiation at ground level. The LAGO Project is operated by the LAGO Collaboration, a non-centralized and distributed collaborative network of more than 80 scientists from over 25 institutions in 9 Latin American countries (currently Argentina, Bolivia, Brazil, Colombia, Ecuador, Mexico, Peru and Venezuela). See the complete list of the Collaboration members and their institutions).</p> <p>The detectors installed in several universities are used as a tool to teach students about particle and astroparticle physics, in particular by taking them to the measurement of muon decay. For the installation of the detectors, the LAGO project is running a course for advanced students of Physics, Masters or PhD in Physics or Astrophysics. It is recommended to know basic programming techniques (any language) and to have a comfortable handling of the Linux operating system. The course consists of 10 theoretical and practical meetings of 4 hours each, where board classes are complemented with audiovisual presentations, seeking the active participation of students in a constructivist model. The curricular units are complemented with virtual laboratories of simulation and/or data analysis.</p> | | | | |

| OFFERING ENTITY: | | Ministry of Economy and Finance - MEF | SDG: | |
| ADDRESS: | | Jr. Junín 319, Cercado de Lima | PHONE: | (51 1) 311 5931 Extension 3534 |
| I. ABOUT OF THE INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Production TOPIC: Competitiveness | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>The National Policy on Competitiveness and Productivity (PNCP) was approved by the Council of Ministers through Supreme Decree No. 345-2018-EF, published on 31 December 2018. The PNCP establishes that the Ministry of Economy and Finance (MEF), through the National Council for Competitiveness and Formalization (CNCF), has a period of 180 days to prepare a proposal for a National Competitiveness and Productivity Plan in coordination with the sectors covered by the PNCP. The National Competitiveness and Productivity Plan specifies, through measures, the implementation of the objectives and guidelines of the NCP, specifying the goals, indicators, actions, deadlines and entities responsible for their implementation. The National Competitiveness and Productivity Plan, as a management instrument, puts into operation the implementation of the strategic axes established in the NCP, in a practical, efficient and measurable way. On 31 January 2019, Supreme Decree No. 038-2019-EF was published, which strengthens the functions of the National Council on Competitiveness and Formalization by amending Supreme Decree No. 024-2002-PCM, providing it with a new organization and delimitation of functions. This norm proposes as one of the main functions of the CNCF to develop the referred Plan that includes priority objectives, guidelines and specific measures, as well as goals and monitoring indicators. In addition, the CNCF is promoting measures that have a regional impact, through the Regional Plans of Competitiveness and Productivity. Both instruments have been developed following an ad-hoc methodology that prioritizes the articulation of various sectors in order to determine the public policies that should be prioritized for the improvement of competitiveness.</p> | | | | |
| III. KIND OF COOPERATION OFFERED | | | | |

| ADDRESS: | | Jr. Lampa 277, Edificio Universal – Piso 8, Lima 1 | PHONE: | (51 1) 311 5930 Extension 3801 |
| I. ABOUT OF THE INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | | FIELD: Investment in infrastructure and public services. TOPIC: Modalities that incorporate the private sector in the development of infrastructure and public services: Public Private Partnerships (PPP), Projects in Assets (PA) and Works for Taxes (OXI). | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>PPAs in Peru are constituted as one of the modalities of private investment participation, in which the risks of the project are adequately distributed and resources are preferably allocated from the private sector, for the implementation of projects that guarantee Optimal levels of services for users. On the other hand, in the PAs, public entities promote private investment over assets owned by them under the following schemes: i) Disposal of assets, which includes total or partial transfer, including the exchange of real estate; ii) Contract of transfer of use, lease, usufruct, surface or other modalities allowed by law. Unlike PPAs, PA contracts cannot commit public resources or transfer risks to the state, unless expressly stated.</p> <p>Finally, through the OXI mechanism, private companies advance the payment of their income tax to directly finance and execute public investment projects that subnational governments and national government entities prioritize. Once the execution or progress of the project is finished, the Public Treasury returns the amount invested to the private company through Certificates (CIPRL or CIPGN) that may be used for the payment of income tax. Subsequently, the public entities return to the Public Treasury, the amount financed for the execution of their projects.</p> | | | | |

| 1.1. | FIELD: State and Governance TOPIC: Modernization and decentralization of public administration | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| <p>Return to the public market a predictive market, where suppliers know in a transparent way and in advance what the State will require, so that they can prepare to sell to it, improving their processes, their products and their prices and, therefore, obtain better costs and benefits for the State, achieving greater efficiency. Eliminate the risk of corruption by directing the purchase to favor a certain supplier, because if no buyer has any interference with the technical specifications or the terms of reference in the purchases, this "directing" risk becomes ZERO.</p> <p>A fair treatment without discrimination, by cancelling the risk of disqualifying bids in an arbitrary way to favor certain suppliers, since the buyer's discretion is significantly reduced, mitigating and almost eliminating the risk of corruption; in fact, in an Electronic Reverse Auction, once the bidding has started, no buyer has any interference on who will win, and, in the Electronic Catalogues, the procedure called "big purchase" has been established, where the application chooses the supplier. A greater participation in public purchases, because when it is perceived as fairer, more suppliers are encouraged to participate, mitigating the risks of agreement and price determination, in addition to the additional savings generated by greater competition.</p> | | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts. | | | <input type="checkbox"/> |
| 3.2. | Exchange of experiences | | | <input checked="" type="checkbox"/> |
| 3.3. | Internships | | | <input checked="" type="checkbox"/> |
| 3.4. | Short term training courses and seminars | | | <input type="checkbox"/> |
| 3.5. | Studies and Joint Researches | | | <input checked="" type="checkbox"/> |
| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | |
| <p>Guatemala - Exchange of experiences to improve the management of GUATECOMPRAS_ GUATECOMPRAS knows the experiences of PERU COMPRAS in the implementation of the electronic tools to optimize the public procurement, especially in the use of Electronic Catalogues of Framework Agreements; as well as on the new technologies and initiatives of new projects like blockchain and the citizen observatory.</p> | | | | |
| V. | TRAINING OFFER | | | |
| 5.1. | Name: Operation of the Electronic Catalogues of Framework Agreements. Modernization of systems in public procurement. | | | |
| 5.2. | Duration: To be determined with the institution concerned. | | | |

| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | |
| | <p>From November 27 to 1 December 2017, an International Internship on Mutual Funds was held that was held at the NM Lima Hotel. Representatives of the supervisory entities of the countries that make up the Pacific Alliance, that is: Colombia, Chile, Mexico and Peru participated in the internship. On the first day of the internship a presentation of the industry was made, the internal organization and the distribution of the different areas of supervision in situ, extra situ were discussed; as well as the current tax scheme. During the following days, the authorization and registration processes, regulatory capital and required guarantees were discussed; on outsourcing and subcontracting, investments, price supply and index of performance comparison; and it was presented on the tools of supervision, risk-based supervision, casuistry of conflicts of interest, bad practices and sanctions, respectively. In the last session the sales processes, aspects of advertising and the fund distributor were explained.</p> <p>During 2014, the SMV attended requests for internships from supervisors of the foreign stock market such as those of the Superintendence of Companies of Ecuador, in matters of registration, structuring of public offers, use of e-prospectus electronic formats, supervision and control of issuers, implementation of MVNET and Workflow computer systems and impact on issuing companies.</p> <p>During 2013, the SMV attended requests for internships from overseas securities market supervisors such as those of the Superintendence of Companies of Ecuador and the Central Bank of Uruguay, on issues related to electronic prospectus registration, investor orientation and compensation and securities settlement.</p> <p>During 2012, the SMV attended internship requests from other foreign regulators such as the Bank of Guatemala, the Superintendence of Banks of Guatemala and the Central Bank of Uruguay, on issues of operation of the capital market and regimes of authorization of entities and market surveillance, evidencing with it the important advances achieved in terms of regulation and supervision by the stock market in Peru in recent years.</p> | | | |
| V. | TRAINING OFFER | | | |
| 5.1. | The MVS offers internships in regulatory development matters as well as supervisory practices to securities market regulators and supervisors at the international level. | | | |
| 5.2. | Duration: 5 days | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: Digital Transformation TOPIC: Electronic File | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| <p>The Electronic File consists of an ordered set of electronic documents corresponding to a certain procedure (coactive collection, inspection, etc.) that taxpayers keep in process before SUNAT. The electronic files are generated by SUNAT, reserving for users the possibility of remotely entering Applications or Virtual Writings, within the framework of such procedures, as part of the interaction that all procedures of this nature entail, without the need to approach SUNAT's offices, thus representing a significant saving in time and resources.</p> <p>The Electronic File consists of an ordered set of electronic documents corresponding to a certain procedure (coactive collection, inspection, etc.) that taxpayers keep in process before SUNAT. The electronic files are generated by SUNAT, reserving for users the possibility of remotely entering Applications or Virtual Writings, within the framework of such procedures, as part of the interaction that all procedures of this nature entail, without the need to approach SUNAT's offices, thus representing a significant saving in time and resources.</p> <p>Finally, it has the option of managing Printed Representations, if required, which have legal value before third parties. Remote and transparent access can be made from anywhere, through any device (PC, laptop, Tablet) and at any time of the day, 7 days a year, thus responding to the needs and reality of the current pace of life. In order to ensure its arrangement, it is uniquely numbered and the foliation is carried out by means of the chronological record of the documents that make it up. Taxpayers have access to the electronic file to enter documents or follow up on their procedures through SUNAT Online Operations. This service is simple, transparent and secure.</p> | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: State and Governance TOPIC: Digital Transformation | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>SUNAT has implemented an efficient and effective system of electronic notification of administrative acts to taxpayers. The system comprises the determination of the electronic notification process under a formal methodology, the identification of risks and indicators, the construction of a regulatory framework that provides legal certainty to taxpayers, and the development of an IT system that ensures the traceability of the documentation managed. There are also follow-up reports and a process control panel.</p> <p>The electronic notification process of administrative acts is a transversal process, to the rest of the processes of the tax administration, and its implementation has meant a significant improvement in terms of facilitating voluntary compliance, as well as generating efficiency in the notification process (cost reduction and ensuring delivery to the final user).</p> | | |
| III. | KIND OF COOPERATION OFFERED | | |

| OFFERING ENTITY: | Peruvian Institute of Nuclear Energy - IPEN | | SDG: |  |
| ADDRESS: | Av. Canadá 1470 San Borja Lima | | PHONE: | (51 1) 226-0030 |
| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Nuclear Technology TOPIC: Nuclear Analytical Techniques | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| <p>The "Oscar Miró Quesada de la Guerra" Nuclear Center (RACSO) of the Peruvian Institute of Nuclear Energy- IPEN, inaugurated in 1989, has a 10 MW Nuclear Reactor in its facilities. The main objective of this facility is the research and development of new technologies; for this purpose, it has modern laboratories that can be quickly modified and expanded to cover the various fields of science. Likewise, these laboratories are available for research activities at national and international level and for joint work with research centers in other countries within the framework of technical-scientific cooperation agreements or alliances.</p> <p>IPEN focuses its promotion and applied scientific research activities through projects of socio-economic interest, in accordance with the country's needs, and encourages the participation of the private sector through the transfer of knowledge of nuclear technology. Nuclear analytical techniques are very powerful tools complemented by X-ray spectroscopic techniques and strongly support scientific research by providing valuable information.</p> | | | | |
| III. | KIND OF COOPERATION OFFERED | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: Geology TOPIC: Geological hazards in the Andes | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>Peru is one of the most seismically active countries in the world. Historical data indicate that off the Peruvian coast, large earthquakes (M>8) associated with the subduction process (interplate earthquakes) occurred. In the last decades, the studies on these earthquakes, located at the edges of tectonic plates, allowed, with reasonable success, to know the location of the danger.</p> <p>In this sense, our attention should be focused today on the threat posed by earthquakes located in the interior of the continent (intra-plate earthquakes). However, in the Andes and in the world in general, the origin of intra-plate earthquakes is not known, nor is the location of all the geological faults that generate them. Consequently, we do not know where the danger is located.</p> <p>England & Jackson (2011) analyzed all the earthquakes of the last century and concluded that the intra-plate earthquakes (related to active geological faults), generated more deaths and destruction. Hence the importance of studying geological faults.</p> | | | | |
| III. KIND OF COOPERATION OFFERED | | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | | |
| 1.1. | FIELD: State and Governance TOPIC: Citizen Participation and Social Control/Public Works Information System – INFOBRAS (by its acronym in Spanish) | | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | | |
| <p>INFOBRAS was implemented in January 2012 and since then it provides information on public works involving public servants from the entities subject to control, officials from the Office of the Comptroller General who perform control services and related services; citizens who participate in citizen control monitor programs, Civil Society Organizations and the public also use it. It represents a good practice as it is a prevention mechanism aligned with the National Policy on Integrity and the Fight against Corruption, adopting the principles of transparency, participation and citizen collaboration, promoted at the national and international levels, where citizens can participate and collaborate in the control and monitoring of the execution of public works to combat functional misconduct and corruption.</p> <p>INFOBRAS represents a clear example of the openness of public information produced by the State aimed at generating public value, based on the use of ICTs, for the benefit of citizens by being able to appropriate the information on public works available and for the benefit of the public entities themselves, which can demonstrate a higher level of transparency and accountability in the works they execute.</p> | | | | | |
| III. KIND OF COOPERATION OFFERED | | | | | |
| 3.1. | Short-term experts. | | | | <input checked="" type="checkbox"/> |
| 3.2. | Exchange of experiences | | | | <input checked="" type="checkbox"/> |
| 3.3. | Internships | | | | <input checked="" type="checkbox"/> |
| 3.4. | Short term training courses and seminars | | | | <input checked="" type="checkbox"/> |
| 3.5. | Studies and Joint Researches | | | | <input type="checkbox"/> |
| IV. PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | | | |
| <p>Chile - Inter-institutional Strengthening for Territorial Control Systems to promote transparency and participation: This was carried out based on the experience in the implementation of INFOBRAS. Likewise, the exchange of methodologies and learning generated by the application of the instruments developed in each country (INFOBRAS in Peru and GEO-CGR in Chile). Finally, during the development of the project, there were training workshops for technical staff of the Chilean Comptroller's Office and for technical staff of the Peruvian Comptroller's Office. Beyond sharing an innovative tool, a successful transfer of knowledge in the field of government e-control was achieved; the experience of South-South cooperation in itself has been very enriching for both countries. On the one hand, it has allowed systematizing the implementation process of the INFOBRAS system so that it can be transferred to other countries in the region, demonstrating that we have good practices in preventive control that can be replicated. On the other hand, the experience of joint work between both comptrollers has strengthened the existing collaboration links between Peru and Chile; and has allowed to weave bridges between the technical teams with a view to continue with the exchange of knowledge in the future.</p> | | | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: State and Governance TOPIC: Citizen Participation and Social Control /Junior Auditing Program | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>The Office of the Comptroller General of the Republic of Peru, in its capacity as the Higher/Supreme Audit Institution (EFS, by its acronym in Spanish) prepares and develops training sessions for secondary education teachers on citizenship issues and methodology (citizen participation) and provides them with tools so that they can transmit their knowledge to their students. The students put into practice what they have learned through the execution of school inspections in public educational institutions, they verify if the public services are being carried out in accordance with their regulations; should/if they find any differences (observations) they inform the head of the entity in order (for him/her) to correct them, and then they follow up on the correction of the observations in order to verify the improvement of the management.</p> <p>This program seeks to develop learning and pedagogical experiences, in students, related to the role of citizens, their responsibilities and the search for the common good, through the practice of values closely related to the development of citizenship skills; encourage students and the educational community to develop favorable attitudes toward the development of an anti-corruption culture in the spaces involved through the "Junior Auditors" Program; and raise teachers' awareness of the commitment to develop innovative pedagogical activity projects related to the operation of school audits, in order to strengthen the development of citizen competencies aimed at the fulfillment of duties and respect for their citizen rights for the general welfare.</p> | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: State and Governance TOPIC: Simultaneous Control Operations for Health Service Providers | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>In 2013, the Department of Health and Environment (currently the Sub-Management of Control of the Health Sector) was created within the Comptroller General of the Republic of Peru, the purpose being to focus governmental control activities on the country's health sector entities, including the Health Services Providers-IPRESS, which are organized into three levels of care in Peru, depending on the complexity of the care provided.</p> <p>The previous structure and the decision to develop cross-cutting control interventions at the national level made it possible in 2016 to carry out "Operation Health Control 2016," in which simultaneous visits were made to 1,575 public health facilities at the first level of care (equivalent to 20% of the total at this level).</p> <p>Two years later, Operation "For Quality Health 2018" was carried out, in which 100% of public health facilities at the second and third levels of care were visited to verify compliance with technical health standards and this year took place "For a quality of health 2019", visiting the same health facilities, but complementing the information collected previously with data on health management and compliance with indicators, all of which has allowed the Comptroller General of the Republic to have its own data that allows it to direct its interventions to activities with greater impact on the provision of health to the citizenry.</p> | | | |

| OFFERING ENTITY: | National Office of Electoral Processes - ONPE | SDG: |  |
| ADDRESS: | Jr. Washington N° 1894 Cercado de Lima | TELEPHONE: | (51 1) 417 0630 |
| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: State and Governance TOPIC: Production, assembly and distribution of electoral material. | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>Critical electoral material (ballots and electoral records) have security measures to prevent forgery. The distribution is carried out in unfavorable conditions due to the special characteristics of the geography of our country, so we must use both conventional means of transport and those available in each region: slider, peque - peque (motorized canoe), mule and in some cases our staff travels on foot. The processes that ONPE has implemented for these activities guarantee that the material reaches each voting location in the amount/quantities required for the installation of the polling location, that it allows all citizens to vote and that it facilitates the work of counting and filling out the electoral records, where the results are the faithful reflection of the popular will. For this purpose, ONPE uses three types of technology in the electoral processes it carries out, these are: Conventional, Automated Scrutiny System and Electronic Presential Voting.</p> <p>Since 2001 the electoral material used for the general elections (2001,2006,2011 and 2016) has been prepared and distributed efficiently; this activity was also successfully carried out for the regional elections of 2002, 2006, 2010, 2014 and 2018, the last two, with the implementation of a second round for the regional election. It is appropriate to note that the process of Production and distribution of electoral material is part of one of the processes established by Electoral ISO norm (54001:2019) which is Electoral Logistics. With this system, the revocations of municipal authorities and complementary municipal elections from 2001 to 2018 and the referendum have been carried out. In all these processes there have been no relevant objections regarding the provision of electoral material. Therefore, there is a lot of experience that can be shared with other countries.</p> | | |
| III. | KIND OF COOPERATION OFFERED | | |
| 3.1. | Short-term experts | | <input type="checkbox"/> |
| 3.2. | Exchange of experiences | | <input checked="" type="checkbox"/> |

| 3.5. | Studies and Joint Researches | | <input type="checkbox"/> |
| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | |
| | <p>Ecuador: Technical assistance to officials of the National Electoral Council of Ecuador, where Peru's National Office of Electoral Processes shared information with 04 officials of the CNE of Ecuador, on the preparation of the NEM 2013 election process. Transportation and lodging expenses were assumed by the CNE Ecuador within the framework of its project "Strengthening Electoral Management". CNE's institutional policies were strengthened and the possibility of implementing ISOs in its quality systems was considered. Proposal to implement the Electronic Non-Presential Vote (VENP, by its acronym in Spanish) in a progressive and gradual manner in Ecuador and to continue it on a larger scale in Peru. To report on Electoral Technical Assistance activities, such as innovative public policy and the relationship of the ONPE with civil society organizations during their election processes. To implement some procedures on the production of the Registration Document and the line of control and production of the electoral material for its reliability and low operational cost.</p> | | |
| V. | TRAINING OFFER | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: State and Governance TOPIC: Implementation and maintenance of the electoral ISO | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>The National Office of Electoral Processes continues to maintain and improve its Electoral Quality Management System, with the achievement of re-certification under the standards of ISO ELECTORAL (to date ISO/TS 54001:2019, which is a technical specification, provided by ISO and the Organization of American States - OAS), for the application of a Management System for electoral bodies ensuring reliable, transparent, free and fair results in electoral processes and the continuous improvement of its electoral services.</p> <p>The Peruvian Electoral System is made up of 3 Agencies, with the ONPE being in charge of the organization and execution of the electoral processes. Within this framework, the ONPE has carried out the implementation as well as the certification of Electoral ISO in the following processes: Electoral Logistics, Voting, Vote Counting, Electoral Education and Control of the Financing of Electoral Campaigns. The ONPE at par with the Electoral ISO, since 2012 has operational processes certified under ISO 9001. This allows, under a process approach, to apply quality management tools to ensure the proper deployment of quality throughout the value chain that runs within the framework of the electoral processes.</p> | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: State and Governance TOPIC: Automated vote counting system | | |
| II. | BRIEF DESCRIPTION OF THE TOPIC | | |
| | <p>The Automated Vote Counting System (SEA, by its acronym in Spanish) is one of the main technological innovations implemented by the National Office of Electoral Processes (ONPE), within the framework of the modernization of public management and digital government.</p> <p>The Automated Vote Counting System is a technological solution that automates the final part of the counting process through the use of electoral computer equipment in environments controlled by the ONPE; and secure communication channels for the transmission and subsequent presentation of results of the electoral process more quickly. The Automated Vote Counting System facilitates the work of the voting station members in the filling out of the Minutes of Vote Counting, significantly reducing the time spent on this activity, as well as the casuistry of minutes observed, which allows results to be obtained sooner.</p> | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: State and Governance TOPIC: Service of Archiving and Preservation of Documents | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>The Registry Archive, as a peripheral archive, is in charge of guarding and providing archival services for the registry documentation coming from the different organic units of the Institution. Likewise, the conservation of this valuable documentary heritage is undergoing a transformation to digital format, supported by a rigorous system for the generation of microforms with legal value, which, in addition to the legal security of the digital images that have been produced, allows citizens to access their registry information, and to do so from any RENIEC agency at the national level, thus complying with making available the documentation that is kept, through an optimal archival service, demonstrating that the care of Peru's cultural heritage goes hand in hand with the implementation of technology, allowing its proper conservation and information service.</p> <p>The Archive is a primary source for research, since it provides information on the documentation kept in its facilities. For this reason, it has developed descriptive tools, such as inventories, catalogues and guides that facilitate user guidance on how to access the required information, which is publicly available. Proposed topics: (1) Archival services provided to the different areas of the Institution and to citizens through computerised means, applying technical archival procedures in accordance with the archival legislation of the National Archives (AGN, by its acronym in Spanish). (2) Conservation of registry documentation, guaranteeing the intangibility of the physical documents and the legal security of the registry information, within the norms of the quality management system (ISO 9001) and the information security management system (ISO 27001). (3) Documentary description; activity that consists of describing the documentary series of the documents of historical value with which the Archive Guide and the Archive Catalogue were elaborated, which allows the academic facilitators to become aware of what these documentary series deal with, as well as their transcendental value as documentary heritage.</p> | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: State and Governance TOPIC: Intercultural Management in the Bilingual Civil Registry | | | |
| II. | BRIEF DESCRIPTION OF THE TOPIC | | | |
| | <p>Intercultural Management in the Bilingual Civil Registry achieves the involvement of vulnerable groups through direct interaction with the civil registrar, process innovation and the use of technology, with the aim of reducing the current gaps in coverage and quality of registry services. Providing solutions to socio-cultural problems, allowing the improvement of the quality of life of hundreds of native populations and the society in general.</p> <p>This is an innovative service with a national scope that provides two types of services: manual and electronic registration. The first modality consists of providing care in their own native language and to provide registrars with bilingual registration materials (printed forms of registration certificates for birth, marriage and death registrations) generally this modality is offered to the most remote areas. In the second modality the whole procedure is carried out through an electronic record, software that allows selecting the native language and printing all the registration forms in bilingual version, generating greater accessibility through the places of service that have Internet in any of RENIEC office at national level.</p> | | | |

| 1.1. | FIELD: State and Governance TOPIC: Mobile Registration Office | | | |
| II. | BRIEF DESCRIPTION OF THE TOPIC | | | |
| | The Civil Registry Management (GRC, by its acronym in Spanish), through the Sub Management of Integration Office, manages the procedure for the delegation of registry functions and incorporation into the Registry System of the Civil Status Registry Offices (OREC, by its acronym in Spanish), which operate in Native Communities, Populated Centre Municipalities and Auxiliary Offices of District or Provincial Municipalities, as well as other registry procedures deriving from functional registry delegation. In 2016 a pilot project was carried out to optimize the periods of registry delegation in Native Communities. The objective of the pilot was to ensure that two native communities in the Junin region have facilities for the delegation of civil registration functions, thus avoiding the omission of registration for citizens living in them, optimizing periods and procedures, reducing costs for citizens of these communities. | | | |

| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | Within the framework of digital government, SENACE has developed the use of electronic document management, which refers to the introduction of information technology into the conventional document processing that takes place in all public offices with their particularities. In general, with the implementation of the document management model by the Secretariat of Digital Government, SENACE is one of the leading entities in the implementation of zero paper not only in its administrative management but also in the core processes. In addition, it is the only entity in the environmental sector that has a certified digitalization line, which allows environmental certification files that were traditionally processed before zero paper, to be digitized with legal evidential value. | | | |

| I. ABOUT OF THE INSTITUTION COOPERATION OFFER | | | | |
| 1.1 | FIELD: Fight Against Organized Crime TOPIC: Strategic Crime Prevention by At-Risk Offending Adolescents from focus Areas | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>Within the framework of the functional competencies of the Office of the Attorney General and alignment to public policies in the area of prevention, the Strategic Crime Prevention Programme carries out its activities through five lines of action: Workshops on Approaching the Population, School Prosecutors, Young Leaders, Parents Building Children of Success and Restorative Juvenile Justice, for which processes and methodological procedures are established that guarantee an articulated intervention to generate public value and social impact. Therefore, the intervention of the Strategic Crime Prevention Programme, from a methodological approach, must contain a plan of activities that responds to the strategies of crime prevention aligned with both Public Policies and National Inter-institutional Plans.</p> <p>Therefore, the methodology for implementing the Strategic Crime Prevention Programme involves various processes and procedures such as: identification of the intervention area, preparation of a situational diagnosis, coordination with local strategic allies, selection of beneficiaries, planning of the intervention, organization of the beneficiary's documentation, execution of the intervention plan, follow-up and monitoring, recording and updating of georeferenced information, among others.</p> | | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1 | FIELD: Fight Against Organized Crime TOPIC: Strategic Crime Prevention / Adolescents in Conflict with the Criminal Law | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>The Office of the Attorney General in the framework of its crime prevention function, takes as a conceptual basis that crime is a social fact or phenomenon where a set of structural, cultural and social processes exist as the origin of its manifestation; and not only as an act performed by a person driven by the environment that requires sanction according to the criminal law; taking into account this conceptual basis, the institutional policy of Crime Prevention is proposed, through the implementation of the Strategic Crime Prevention Program (PPED, by its acronym in Spanish) that integrates the Lines of Action such as: Restorative Juvenile Justice, Youth Leaders, Prosecutors in Your School, Parents Building Children Success, and Conferences of Approach to the Population.</p> <p>In this regard, it is of vital importance to count on the action of Family Prosecutors and with the support of a group of professionals who make up the Interdisciplinary Technical Teams in order to intervene from a community, preventive and restorative approach to adolescents in conflict with the criminal law, coming from the Prosecution Districts where the aforementioned Line of Action is implemented with the aim of achieving social reintegration.</p> | | |

| I. ABOUT OF THE INSTITUTION COOPERATION OFFER | | | | |
| 1.1. | FIELD: State and Governance TOPIC: Criminal procedure reform in Peru | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>Criminal Policy focuses on two moments: the first occurs before the crime: prevention; the second afterwards, repression and resocialization. The Reform of Criminal Procedure is at this second level and especially in the area of repression. To be clear about this aspect and its fundamentals: (first, the reorientation of criminal procedure norms to a constitutional norm that respects international treaties; second, the growing concern in the region on the increase in crime rates and thirdly the growing perception of corruption and the lack of accountability of the administration of justice); this allows to know the importance of the Criminal Procedure Reform in Peru; to understand its results, its inputs and the relationship it has with respect to crime prevention.</p> <p>The Plan for the Consolidation of the Criminal Procedure Reform establishes a cross-cutting strategy to address the implementation of the Criminal Procedure Code, focusing its action on the axes of discharge (before the entry into force of the Criminal Procedure Code), settlement (after the entry into force of the Criminal Procedure Code) and Zero burden (proper implementation and sustainability of the Criminal Procedure Code), which will optimize the case clearance process under the 1940 Code of Criminal Procedure and to strengthen the planning and operation of the entry into force of the Criminal Procedure Code, under criteria of effectiveness and quality of justice service, citizen satisfaction and efficiency in the use of public resources.</p> | | | | |

| | Ecuador: Within the framework of the Binational Development Plan for the Peru-Ecuador Border Region, the Plan for the Prevention and Control of Cervical Cancer in the Tumbes Region was developed and implemented through screening using Human Papillomavirus (HPV) molecular tests, with the participation of community health agents and the self-taking of the vaginal sample. This activity was carried out during the period August 2017 - August 2018. The Plan provided to the women between the ages of 30 and 49 with access to cervical cancer screening through molecular HPV testing, using immunofluorescence technology (care HPV) through self-sampling of vaginal specimens, which testing has a sensitivity level of 90%. By the end of the screening coverage, 1,034 positive cases were identified, promoting continuity of care at the first and second level of care, according to the Technical Guidelines for Clinical Practice for the Prevention and Management of Cervical Cancer, approved by R.M. N° 1013 - 2016 / MINSA. | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| | 1.1. | FIELD: Health TOPIC: Environmental certification of cemeteries and crematoria | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>In order to guarantee the adequate operation of cemeteries and crematoria, they must have preventive and corrective environmental management instruments such as environmental impact studies and environmental adaptation and management programs, because in their operation, leachates, solid waste and gas emissions are generated, the which are linked to the offer of funeral services and related activities; however, most of cemeteries and crematoria do not have these management instruments.</p> <p>In this regard, the country has been implementing environmental certification of cemeteries and crematoria, taking into account that many of these final disposal establishments are more than 50 years old and, in this way, the impacts they generate are adequately controlled and managed. In this sense, the mechanisms of environmental certification that the health sector has been implementing could be replicated in countries with similar characteristics, such as: Venezuela, Colombia, Ecuador, Chile and Bolivia.</p> | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Health TOPIC: Vector control | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The Anopheles albimanus mosquito is the vector of malaria in the northern region of Peru, and it reproduces mainly in the wells where rice is sown; therefore, in the search for a more sustainable strategy of vector control, we have worked on an initiative to change the traditional irrigation methodology that is by permanent flooding for that of intermittent dry periods in the cultivation of rice, to cut the biological cycle of the Anopheles albimanus. The implementation of this irrigation technique with intermittent dry periods in experimental and commercial fields has shown that a reduction of up to 85% of the mosquito population is achieved, an increase of up to 20% in rice production, a decrease in the expenditure of irrigation water by up to 30%, and a decrease of one third in the amount of pesticides used for rice pest control are achievable. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |

| OFFERING ENTITY: | National Institute of Health - INS | SDG: |  |
| ADDRESS: | Calle Cápac Yupanqui 1400, Jesús María - Perú | TELEPHONE: | (51-1) 748 1111 |
| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: Health TOPIC: Experience in development and validation of food guides. | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>Studies show the persistence of chronic malnutrition in children, the presence of anemia especially in young children and pregnant women, and on the other hand, weight gain (overweight and obesity) in children, adolescents, youths, adults and older adults in our country. These findings imply that the population is at high risk of developing nutrition-related diseases, which have important public health implications and therefore require the design of public health policies to address them.</p> <p>In this regard, one of the internationally recommended strategies for contributing to the reduction of nutritional problems is the preparation of food guides that take into account the promotion of healthy eating and thus the National Food and Nutrition Center (CENAN, by its acronym in Spanish) of the INS, has developed important tools for the fight against malnutrition and anemia, which experience it offers to share, particularly in the results of the process and validation of food guides described.</p> | | |

| 1.1. | FIELD: Health TOPIC: Research development experiences in anemia and chronic malnutrition. | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>In Peru, anemia and chronic malnutrition are the most important nutritional problems, which has led the National Food and Nutrition Center (CENAN) of the INS to strengthen its research capabilities to generate information and strategies to address these problems. For this reason, diverse investigations have been carried out, such as: "Community trial to improve adherence to micronutrient supplementation in children aged 6 to 35 months in the Regional Health Directorates of Puno, Tacna, Loreto and East Lima", "Factors associated with chronic child malnutrition in a cohort of newborns in health facilities of the Ministry of Health in the health regions of Huancavelica and Loreto", and "Factors associated with anaemia in newborns and children of 3, 6, 9 and 12 months of age cared for in health facilities of the Ministry of Health in mountain and jungle areas."</p> <p>The results of the research will be presented at Workshops on research development experiences in anemia and chronic malnutrition.</p> | | |

| OFFERING ENTITY: | Integral Health Insurance - SIS | | SDG: |   |
| ADDRESS: | Calle Carlos Gonzales N° 212, San Miguel – Lima | | TELEPHONE: | (51-1) 514 5555 |
| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Health TOPIC: Universal Health Insurance | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>Universal health insurance is a process aimed at ensuring that the entire population resident in national territory has health insurance that allows them access to a set of health benefits of a preventive, promotional, recuperative and rehabilitative nature, under appropriate conditions of efficiency, equity, opportunity, quality and dignity, based on Essential Health Insurance Plan (PEAS, by its acronym in Spanish).</p> <p>Integral Health Insurance (SIS, by its acronym in Spanish) is public Health Insurance Fund Management Institution (IAFAS), with functions of receiving, accessing and/or managing funds for coverage of health care for Peruvians who do not have health insurance. Since its creation in 2002, SIS has progressively expanded its coverage to include poor and vulnerable populations on one hand, and health conditions covered on the other. In addition to improving coverage, SIS introduced a change in the payment system by seeking to replace payment for inputs with payment for outputs by reimbursing providers against submission of evidence of having provided eligible services to those insured by SIS.</p> | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1 | FIELD: Health TOPIC: Protection of Health Rights | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | Share experience developed by National Health Administration through telephone channel and use of dedicated lines with national reach to interact before Health Care Provider Institutions (IPRESS, by its acronym in Spanish) and Health Insurance Fund Management Institutions (IAFAS, by its acronym in Spanish) to guarantee right of access to health services in Peru. SUSALUD provides citizens who use health services 24 hours a day, 365 days a year, not only giving them a means to present their complaints but also a whole package of immediate actions to solve when they feel their rights have been violated, mainly in those cases where the life of the user is at risk, thus exercising the role of protector and defender of health rights where 80% of users perceive that their rights have been restored. As a result of the experience, it has been possible to protect groups at risk at the national level whose health rights had been violated, ensuring a timely and effective response, with inter-institutional and intersectoral actions that make it possible to reach the solution that is closest to the user in order to guarantee their health rights. | | | |

| 1.1 | FIELD: Health TOPIC: Technical Assistance on the QALI WARMA Co-Management Model | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The co-management model is a mechanism that involves articulated participation and cooperation between civil society actors and the public and private sectors, in order to provide a quality service to the users of the Qali Warma National Feeding Program (PNAE, by its acronym in Spanish). Thus, the director of the educational institution, teachers or administrative staff and representatives of mothers and/or fathers form part of the School Food Committee (CAE, by its acronym in Spanish), whose task is to promote and execute actions during the phases of reception, storage, preparation, distribution and consumption of the food delivered by the Qali Warma National Feeding Program. Civil society also forms part of the Procurement Committees (CC, by its acronym in Spanish), which are responsible for contracting for the goods and/or services needed to provide food service, thus guaranteeing a transparent and quality service for the benefit of children in the country's public educational institutions. | | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: Health TOPIC: Comprehensive Care in Early Childhood | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | The objective of National Program Cuna Más (National Cradle Plus Program) (PNCM, by its acronym in Spanish) of the Ministry of Development and Social Inclusion is to improve development of children under 36 months who live in conditions of poverty or extreme poverty, providing comprehensive care through two modalities: (i) Day Care Service, and (ii) Accompanying families in the care and development of their children. The Day Care Service (SCD, by its acronym in Spanish) provides comprehensive care for children aged 6 to 36 months; and the Family Accompaniment Service (SAF, by its acronym in Spanish) provides care for pregnant mothers and children aged 0 to 36 months. Working with children involves comprehensive care: development and learning, families, nutrition and health. The provision of both services includes the integration of lines of intervention in order to strengthen early childhood development. Also includes the monitoring of child development. | | |

| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| 1.1 | FIELD: Environment TOPIC: Environmental Impact Assessment | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>Considering that level of significant environmental impact depends directly on the production that activity generates, the minimum threshold for 21 activities in the agriculture and irrigation sector was established in order to identify which users must comply with the administrative procedure. The study considered national cases and international environmental regulations in Latin America.</p> <p>This type of study contributes to Sustainable Development Objective N° 12 of sustainable consumption and production, since the activities subject to evaluation will require environmental management plans according to their impact levels and those activities of a smaller scale will be governed by national regulations in order to avoid environmental pollution.</p> | | | |

| I. ABOUT OF THE INSTITUTION COOPERATION OFFER | | | | |
| 1.1 | FIELD: Environment TOPIC: a) Soil survey, b) classification of land according to its capacity for increased use and c) agroecological zoning | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>Topics a) and b) are provided for in Regulations approved by Supreme Decrees of the Ministry of Agriculture and Irrigation (SD No. 010-2010-AG and SD No. 017-2009-AG) and topic c) is in Methodological Guide adapted to conditions specific to Peru and at a scale of detail soon to be approved by Specific Norm.</p> <p>Soil survey consists of representing different types of soils of a geographical setting on a map with cartographic precision. It is based on the information seen in satellite images dumped on photogrammetric pages as well as having previous information such as life zones, surface geology and physiography. The classification of lands by Major Use Capacity is the generation of information on the natural abilities of the land, as expressed in Clean cultivation, permanent crops, pasture, forest production and protection areas (non-agricultural abilities). Finally, agroecological zoning is generation of systematized information about the micro-location of crops according to the ecological environment, which allows users of this information to plan land use in an optimal and sustainable manner over time.</p> | | | | |

| OFFERING ENTITY: | Ministry of Agriculture and Irrigation - MINAGRI Rural Agricultural Productive Development Program – AGRO RURAL | | SDG: |   |
| ADDRESS: | Av. La Universidad N° 200, La Molina, Lima | | TELEPHONE: | (511) 2098600 |
| I. | ABOUT OF THE INSTITUTION COOPERATION OFFER | | | |
| | 1.1 | FIELD: Agriculture TOPIC: Sowing and harvesting of water | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>The project “Adaptación al Impacto del retroceso Acelerado de Glaciares en los Andes Tropicales (Adaptation to the Impact of Accelerated Glacier Retreat in the Tropical Andes) – PRAA (by its acronym in Spanish)” executed between 2008 and 2011, includes, among others, the management of 1,032 has of high Andean grasslands and around 850 has of pine and queñual (polylepis) forest plantations. This project was implemented within the framework of sowing and harvesting of water, in order to increase, in the middle and upper part of the sub-basin, rainwater retention and increase aquifer levels and river and stream flows.</p> <p>The purpose of the exchange of experience would be to appreciate the results achieved so far and to learn from good experiences for application in other similar areas.</p> | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| | 3.1 | Short-term experts | <input type="checkbox"/> | |
| | 3.2 | Exchange of experiences | <input checked="" type="checkbox"/> | |
| | 3.3 | Internships | <input type="checkbox"/> | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1 | FIELD: Environment TOPIC: Identification of Drought Tolerant Quinoa Varieties | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>Quinoa is one of the most representative crops in this region because of its high content of essential amino acids, which makes it a superfood, as it contributes to food security.</p> <p>Under a climate change scenario, it is important to study identification of varieties with high tolerance to drought conditions. This physiological response is associated with the genetic potential of the crop and its physiological and biochemical response, which to date have not been well studied, so the results of this project would contribute to knowledge management in quinoa and its mechanism of adaptation to drought conditions under a holistic context.</p> | | | |
| III. | KIND OF COOPERATION OFFERED | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1 | FIELD: Agriculture TOPIC: Precision agriculture | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| <p>The different climate change simulation models indicate a water resource deficit at the South American Region level, since in the last 30 years the areas with a water resource deficit and the periodicity of cooling events have increased, causing problems in the production of potato and corn crops in the country, so it is necessary to identify varieties with the capacity to adapt to these conditions.</p> <p>The identification of varieties with a better capacity to adapt to droughts and frosts and a better response to increase in carbon dioxide will allow potato and corn crops to adapt to different climate change scenarios. The implementation of a precision farming platform will make it possible to evaluate response of these varieties with unmanned flight vehicles through the incorporation of multispectral imaging, and the identification of genes associated with the response of each of the factors evaluated.</p> | | | | |
| III. | KIND OF COOPERATION OFFERED | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1 | FIELD: Production TOPIC: National Coffee and Cocoa Program | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | Improvement of coffee and cocoa crop production through innovation and good management practices To date in coffee has been conducting collections of plant material with outstanding characteristics such as tolerance to rust and have good quality cup. In cocoa, work is being done to identify hybrids that show lower levels of cadmium absorption and thus recommend them as rootstocks (graft carriers). Finally, at the biotechnology level, work is being done to induce somatic embryogenesis in elite cocoa and coffee genotypes using floral explants. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1 | FIELD: Agriculture TOPIC: Conservation of germplasm and genetic improvement of plant species | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| In Chincha valley, there are various species of agro-export crops such as vines (<i>Vitis sp</i>) and avocado (<i>Persea americana</i>) mainly; in cereals, corn (<i>Zea mays</i>) stands out, especially for fodder. As native crops for food security are the legumes and amongst them the most prominent are the beans (<i>Phaseolus vulgaris</i>) and the beanstalk (<i>Phaseolus lunatus</i>); crops of importance is so INIA has germplasm and materials which should be intensified work in the areas of conservation of germplasm, to give it a utility, as well as with the promising genes and other introduced; promote large-scale breeding work, because there are references from solid programs that existed in the Agricultural Experimental Station-Chincha, such as the National Program of Grain Legumes where many varieties were released with the support and strategic partner of CIAT based in Cali-Colombia; therefore, support is requested to carry out conservation work, improvement, propagation of quality seedlings and produce seeds of the different categories of priority species in the Chincha valley and therefore in the Ica-Peru region. | | | | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1 | FIELD: Management of crop residues TOPIC: Worm farming "Techo a Dos Aguas" (Gabled Roof) | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>"Techo a Dos Aguas" Worm Farming is based on the intensive breeding of worms for commercial production of humus, from an organic substrate, whose fundamental principle is to generate competition between worms for food (compost) they consume, during the process of humus production. It is a natural decomposition process, similar to composting, in which the organic material, besides being attacked by microorganisms (fungi, bacteria, actinomycetes, yeasts, etc.), existing in the natural environment, is also attacked by the complex digestive system of the worm.</p> <p>The advantages of the technology are to produce excellent quality worm compost and humus, with low salt content; it accelerates the production of humus, due to the competition generated among worms for food (up to four crops per year); low installation and maintenance costs (high profitability for the producer), and simpler method of humus production than traditional systems.</p> | | | | |
| III. KIND OF COOPERATION OFFERED | | | | |
| 3.1 | Short-term experts | | <input type="checkbox"/> | |

| I. ABOUT INSTITUTION COOPERATION OFFER | | | | |
| 1.1 | FIELD: Production TOPIC: Artisanal Fishing Extension Service - SEPA (by its acronym in Spanish) | | | |
| II. BRIEF DESCRIPTION OF TOPIC | | | | |
| <p>The Artisanal Fishing Extension Service - SEPA is a service provided by the General Directorate of Artisanal Fishing in 32 artisanal fishing jurisdictions, both in the coastal and continental areas, within which direct interventions are developed "in situ" through specialized professionals, according to six components: Formalization, Good Fishing Practices, Social Security, Integration to the Commercialization System, Creation of the Credit Culture and Organizational Strengthening. The experience obtained by the Directorate-General for Artisanal Fisheries (DGPA, by its acronym in Spanish) in the development of this service since 2008, allows to show the functioning of the model and the results achieved, as well as through the exchange of experiences with similar interventions will allow to mutually enhance this service, both in the DGPA and in the entity participating in this cooperation scheme.</p> <p>This service is oriented to promote the activity of the artisan fishing in Peru, which according to Structural Survey of the Artisan Fishing 2015- ENEPA-2015 has more than 67,000 artisan fishermen and around 16,000 artisan boats in Peru, through actions of sensitization, training, advising of the agents of the artisan fishing for their formalization in the same places where they develop their activities. The interventions that are carried out within the framework of SEPA affect and prioritize aspects of a technical-productive, organisational and formalization nature, which helps the group of artisan fishermen and processors to increase their levels of organization, income and improve aspects of the marketing of their products by observing health and safety standards, all in harmony with the environment and the sustainable and rational exploitation of fish resources.</p> | | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: Production / Fisheries TOPIC: Monitoring and control of fishing and aquaculture activities to eradicate Illegal, Unreported and Unregulated Fishing (IUU). | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>The Ministry of Production, as governing body for fisheries matters, runs General Directorate of Supervision, Inspection and Sanction, through which it carries out the supervision and inspection of fishing and aquaculture activities in processing plants, fishing boats, docks, fishing landings, transport and marketing and aquaculture production centers in the marine and continental environment.</p> <p>Also, the use of technological means to verify compliance with fisheries and aquaculture regulations such as the Satellite Tracking System, Electronic Logbook, Video Surveillance Cameras, Virtual Systems for Traceability of Fisheries, actions that contribute to combating Illegal Undeclared and Unregulated (IUU) fishing.</p> | | |
| III. | KIND OF COOPERATION OFFERED | | |
| | 3.1. | Short-term experts | <input checked="" type="checkbox"/> |
| | 3.2. | Exchange of experiences | <input checked="" type="checkbox"/> |
| | 3.3. | Internships | <input checked="" type="checkbox"/> |
| | 3.4. | Short term training courses and seminars | <input type="checkbox"/> |
| | 3.5. | Studies and Joint Researches | <input type="checkbox"/> |
| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | |
| | <p>Panama: Maritime Authority of Panama and Resources Authority "Exchange of experiences in supervision and control to strengthen measures to eradicate illegal, unreported and unregulated (IUU) fishing by national and foreign flag vessels" / Supervision and control of fishing and aquaculture activities / Satellite Monitoring System (SISESAT) of national and foreign fishing vessels / Actions for the implementation of the MERP agreement for the fight against illegal unregulated fishing / Participation in regional and international organizations.</p> <p>Colombia: National Authority of Aquaculture and Fishing - AUNAP "To homologate the system of monitoring and control of the fishing activity in order to strengthen the activity of trade of the hydrobiological resources in the zone of border integration (ZIP, by its acronym in Spanish) Peru-Colombia".</p> | | |
| V. | TRAINING OFFER | | |
| | 5.1. | Name: Exchange of experiences in monitoring and control of fishing and aquaculture activities, to strengthen measures to eradicate Illegal, Unreported and Unregulated Fishing (IUU). | |
| | 5.2. | Duration: To be determined with the institution interested | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Production / Fisheries TOPIC: Fishing gear technology | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The training will focus in a theoretical and practical way on different fishing gear and methods used for extraction of hydrobiological resources. These fishing gears are friendly and selective in terms of the sustainable use of the resources of both the artisanal and industrial fisheries | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts | | <input checked="" type="checkbox"/> | |
| 3.2. | Exchange of experiences | | <input type="checkbox"/> | |
| 3.3. | Internships | | <input type="checkbox"/> | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Production / Fisheries TOPIC: Reproductive aspects of fish and invertebrates | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The training will provide knowledge on monitoring reproductive condition, obtaining reproductive indices (spawning fraction, gonadosomatic index, somatic condition indices) and histological processing of fish and invertebrate gonads, using the paraffin infiltration and freezing technique. The stages of gonadal maturity shall also be determined and the reproductive cycle shall be described, as well as criteria and conditions necessary for the calculation of the gonadal maturity size | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts | | <input checked="" type="checkbox"/> | |
| 3.2. | Exchange of experiences | | <input type="checkbox"/> | |
| 3.3. | Internships (Training In-Service) | | <input checked="" type="checkbox"/> | |

| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | |
| | Productive technology transfer Bolivia - Peru of the textile complex: Based on a programming more adjusted to the needs of the target population, taking as a basis the proposal by CITE, 32 hours of theoretical-practical training were completed, distributed 4 days, covering a total of 50 participants among llama breeders and textile producers of clothing and accessories. New inter-institutional relations between CITE Textil Cam lidos Arequipa and the technical team of CIP Potos , which is part of the function of articulating innovation actors. CITE Textil Cam lidos Arequipa can open a line of research on the industrialization of llama fiber, on the subject of de-bristling of llama wool, given that in the upper zone of Arequipa there is an interesting number of llamas, to which could be given an alternative of exploiting the llama wool; this initiative would be framed in the function of promoting R+D+I that CITE has. CITE Textil Cam lidos Arequipa can promote design and development services for textile products to the Productive Innovation Center (CIP, by its acronym in Spanish) Potos , since this line of work is not developed there and is very important for textile products. The participants of the event conclude that it will be very important to continue seeking the cooperation of specialists from Peru, especially in issues of clothing production, such as design and development of prototypes, fabrics and finishes and quality control throughout these processes. | | |
| V. | TRAINING OFFER | | |
| 5.1. | Name: Design and development of products for textile products in alpaca wool | | |
| 5.2. | Duration: To be determined with the institution concerned | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Production TOPIC: Programming of panels and accessories in knitted fabric | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | <p>Programming of knitting panels and accessories using Shima Seiki's SDS ONE technology In order to make garments and accessories in knitted fabric, the components must be previously woven. In that sense, to achieve the weaving of the components using electronic machines, it is necessary previously to make the programs in a specialized software.</p> <p>The programs that are developed work in diverse technologies, one of them is using the Japanese technology SDS ONE Shima Seiki, leading technology, that is being using at the moment, in Peru, in the textile companies that work in knitted fabric.</p> <p>The programming is done from a computer; once the program is finished it is saved to a USB device and then taken to an electronic weaving machine that will take care of the actual weaving of the panel or component. This will be executed through the Center for Productive Innovation and Technology Transfer (CITE) textile Camelids Arequipa.</p> | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Environment TOPIC: Effluent treatment in tanneries | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | To generate new effluent treatments for tanneries, through innovation, technological development and research; thus, mitigating the negative impact generated by wastewater containing high concentrations of BOD, COD, TSS, Cr and Sulfur. To generate new processes to implement neural networks in the leather and footwear sector, through innovation, technological development and research, since companies in the leather and footwear sector need to implement technologies that generate a path towards automation, precision and optimization of processes to produce better products and meet the needs of today's market. This will be executed through Center for Productive Innovation and Technology Transfer (CITE)ccal Trujillo. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts | | <input type="checkbox"/> | |
| 3.2. | Exchange of experiences | | <input type="checkbox"/> | |
| 3.3. | Internships (In-Service training) | | <input checked="" type="checkbox"/> | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: Production TOPIC: Tannery | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | Tanneries currently have serious problems due to use of chemical inputs and the waste they generate, in addition to the fact that they were not designed to carry out experiments. Therefore, CITEccal Lima facilitates innovation, quality improvement, process optimization and the search for solutions to tannery problems, through its pilot tannery plant, with equipment that allows the manufacture of small trial batches. We have a primary effluent treatment system as a scale model to be replicated. It will be executed through Center for Productive Innovation and Technology Transfer (CITE)ccal Lima. | | | |
| III. | KIND OF COOPERATION OFFERED | | | |
| 3.1. | Short-term experts | | <input type="checkbox"/> | |
| 3.2. | Exchange of experiences | | <input type="checkbox"/> | |
| 3.3. | Internships (In-Service training) | | <input type="checkbox"/> | |
| 3.4. | Short term training courses and seminars: 12 participants per Course/Seminar, duration 22 hours | | <input checked="" type="checkbox"/> | |
| 3.5. | Studies and Joint Researches: Alternative inputs to chrome, effluent and solid waste treatment | | <input checked="" type="checkbox"/> | |
| IV. | PREVIOUS EXPERIENCE IN COOPERATING WITH OTHER COUNTRIES | | | |
| | Paraguay "Technical Strengthening and Optimization in Production Processes and Products in Leather": The beneficiaries said in the presence of a representative of the Embassy of Paraguay and the International Cooperation Coordinator of ITP - Peru that they were satisfied with the knowledge acquired, it was what they were looking for to start designing the services they have projected for the footwear sector in their country. Exchange of experiences regarding footwear production in Paraguay and Peru. Tour of the production plant, including the areas of product development, sole production and storage of raw materials and finished products. | | | |
| V. | TRAINING OFFER | | | |
| 5.1. | Name: Tanning Technologies with a focus on environmental sustainability Workshop: Social and environmental responsibility - Control of emissions from tanneries | | | |
| 5.2. | Duration: 3 days | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | | |
| 1.1. | FIELD: State and Governance TOPIC: Information Technologies | | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | | |
| | The Peruvian electronic voting system is a technological solution designed and created by the National Office for Electoral Processes (ONPE, by its acronym in Spanish) for the processing of electoral results with strict security standards. It is a form of voting that differs from the traditional method in that it uses hardware and software to automate the processes of verifying the voter's identity, casting the vote, counting of votes, issuing reports on results and issuing reports on results. There are two modes, Electronic Presential Voting (EPV) and Electronic Non-Presential Voting (ENPV). | | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: State and Governance TOPIC: Electoral Geographic Information System | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>The Electoral Geographic Information System (SIGE, by its acronym in Spanish) is a tool that presents electoral information in a dynamic cartographic viewer, comprised of the administrative political circumscriptions and electoral regions, with support information such as the distribution of the populated centers, the national road network, the river network, the departmental, provincial and district capitals, and the thematic information such as levels of poverty, rurality, results of electoral processes, according to the territorial scopes of observation of the user.</p> <p>The ONPE SIGE has been institutionalized as a necessary tool for electoral planning since its inception in 2016, for which training has been given to different actors within the institution.</p> <p>Within the country, training has been provided in the use and exploitation of information. To this end, framework agreements have been signed for an indefinite period with various institutions, such as the Congress of the Republic, Presidency of the Council of Ministers (PCM, by its acronym in Spanish), National Registry of Identification and Marital Status (RENIEC, by its acronym in Spanish), the Ombudsman's Office, the Joint Command and the National Geographic Institute.</p> | | |

| I. | ABOUT INSTITUTION COOPERATION OFFER | | |
| 1.1. | FIELD: Technological innovation TOPIC: Georeferencing applied to electoral system | | |
| II. | BRIEF DESCRIPTION OF TOPIC | | |
| | <p>RENIEC, through the Management of the Electoral Registry has been developing a System of Geographic Information (SIG, by its acronym in Spanish) that has the particularity of combining the cadastral information with the data coming from the Unique Registry of Identification of Natural Persons (RUIPN, by its acronym in Spanish) which RENIEC administers in its charge. In this way, the Citizens' Georeferencing System was created, becoming the largest and most dynamic database of citizens in the country, providing statistical information at the district level.</p> <p>The application of the technology is currently used in the electoral field.</p> <ul style="list-style-type: none"> - It allows the identification of the distortions of the domiciliary data and with this it avoids that citizens who reside in a certain geographical area may vote in a different one. - It makes possible the delivery of the Georeferenced Electoral Roll which helps the Strategic Planning of the electoral processes, remaining at the disposal of the National Office of Electoral Processes (ONPE, by its acronym in Spanish) and the National Jury of Elections (JNE, by its acronym in Spanish) for the fulfillment of their functions if they so decide. - It benefits the state in general, by allowing RUIPN to contribute to the planning of public policies and social programs, serving citizens in a focused manner. | | |
